SILVER DOLLARS CONTINUE HOT PACE

Recently Graded ANACS Coins In Demand

The Market in Depth

EDITOR'S NOTE

As the rare coin industry progresses and becomes more recognized for its professionalism, it has become necessary for CDN to progress in anticipation of the needs of the industry. To this end CDN has implemented changes which will increase the overall knowledge the reader may grasp while developing their expertise. Please check page two of the CDN. Also see important changes in the next Monthly Summary.

For those subscribers who want to know when your subscription expires, your expiration date appears on your CDN envelope. It is the last three digits above your name. For example, 70648-506. The 5 represents 1985, while the 06 is the month, June. For those with two digits after 506-25, the 25 represents the week of the year your subscription expires.

Amid recent controversies involving the ANACS grading policies, there are a number of dealers who are very actively seeking ANACS graded coins. They are willing to pay in the bid/ask range for recently graded coins. More specifically they are looking for type, dollars, gold, and commemoratives with a strong emphasis on MS-63 and better coins. Whether or not the internal problems of ANACS are solved to everyones' satisfaction, for the time being, it is not having an adverse effect on the market; rather, in spite of these problems, papered coins remain strong.

CDN has received many opinions of late that indicates the collector is returning to an active buying state. Dealers are again receiving want lists from collectors who are attempting to advance their personal collections. Collectors are the mainstay of our industry. When they are actively seeking to upgrade or add to their collections, dealers become more involved. The potential for graded coins in circulated grades, as well as mint state, is greatly enhanced.

The inactive collector is the main reason graded coins don't move upward as often as mint state coins. Without the collector, dealers and investors usually limit their main purchases to uncirculated coins; be they rolls or singles, MS-60 to MS-65. BU coins are generally rarer, by nature, than circulated ones. Thus, bids will fluctuate more rapidly for BU coins.

If one compares the rare coin market today with that of one year ago, it can be seen that, despite running in tandem with gold and silver bullion over the years, they appear to be going in opposite directions now. The week of January 1, 1984, CDN listed silver at $8.60 and gold at $379.40. This week it is $6.29 and $308 respectively. But, the rare coin market is obviously in a much hotter state of being. Granted, prices of various issues may be lower, but confidence is high by dealers and customers alike. They generally feel that prices are at a low point and they are looking for the best buys available. As strong as the market appears, it must be remembered, if gold and silver do get hot, then the rare coin market will benefit all the more.

This Week's Market

CENTS: There's not a lot of activity in BU Lincoln rolls at the moment. Because of the holidays trading has been very light, but the 1944-P and 45-P are bid at a higher $12.50 each. Several of the late date proof rolls are lower as sellers offer them at discount prices. This has been the case for the last couple of months. The proof rolls which are lower are the 1970-S, 73-S, 74-S, 79-S TI, and 82-S.

NICKELS: The 1949-D/S Jefferson nickel has suffered set-backs in all mint state grade ranges. Buyers do not seem to be too interested in this issue at this time. There has been very modest trading in BU rolls of Jefferson and Buffalo nickels in the last two weeks. The only Jefferson changes appear for 1965 and 66 sms, and proof rolls 1973-S, 75-S, 78-S, 79-S TI & II, 80-S, 81-S, 82-S, and 84-S. All changes were to the downside.

DIMES: BU Mercury roll activity is somewhat limited, although there are still buyers for strict original rolls. Prices remain unchanged which is also the case for BU Roosevelt rolls. The only price changes occurred in proof rolls 1964 and later; most of the rolls were lower. The encouraging signs are seen in roll sets of Mercury and Roosevelt dimes which are both higher.

The 1982 plain dime appears on page two for the first time. Listed prices are for grades AU through MS-65. It is noted that these prices are for full strikes. Weak strikes trade at much much lower prices.

QUARTERS: BU Washington quarter rolls do not show any increased bids, nevertheless, a number of dealers are willing to pay bid on most rolls and are actively seeking original roll deals. The 1958-P roll is showing some weakness at a lower $180 "bid". A few of the proof rolls are lower: 1974-S, 79-S TI, 83-S, and 84-S.

HALVES: Activity is still strong for original BU Walking Liberty half rolls. Bids remain unchanged while most dealers just ask for original rolls with quotes.

Franklin rolls still have a strong following for most rolls at current levels, but for the most part, actively increasing "bids" has been halted. Two rolls are lower this week (1953-P - $550 and 1955-P - $380). There are a number of BU rolls of 40% silver on want lists at higher "bids". Those with "plus" signs are 1965, 66, 68-D, 68-S pr., 69-D, and 69-S pr. There are a few "minus" signs on the late date proof rolls.

DOLLARS: BU dollars are leading the way into the new year. With MS-65 singles showing many "plus" signs this week, it is obvious that many dealers are in the hunt. Inventories are quite low (it usually is) for this elusive grade. More dealers are beginning to join the group of advocates who believe that lesser grade mint state dollars are a good buy. This may be so, if the coin is priced according to grade.

Original dollar rolls are again topping many want lists. Dealers are picky; well they should be. Their clients are picky also. The buyers are willing to pay high prices, but, herein lies a problem. There are other dealers willing to sell rolls at less than those bids, thus causing a pricing confusion. But alas, the answer is simple and the same as always: "You get what you pay for", meaning, there is definitely a difference in quality.

The 1983 and 84 Olympic dollars appear on page two. At this point in time, the coins are still available through government distributors so CDN is listing only "ask" prices. This is also the case for the Olympic $10 gold.

PROOF SETS and MINT SETS: It looks like profit-taking time for the 1961-64 proof sets. It might be temporary, but for now "bid" has dropped to $16.50 for the 1961-63 sets, while $13.75 is bid for 1964 sets.

Original mint sets from 1951 through 1958 almost always have buyers at bid/ask levels, but recently, the 1959 and 61 sets have become more popular. Both are higher this week. The 1947 set is softer at $650 "bid".

COMMEMORATIVES: Complete commemorative sets, in MS-60 and MS-63 have now been added to page two. The 1982 Washington commems are listed at the very end of commemorative singles. They are not included in complete set pricing.

Many "plus" signs abound page two for MS-65 commems. Dealers started raising their buy prices on many issues again last week. Thus, complete set prices are up substantially. Dealers are once again stressing quality and some even demand ANACS graded coins.

TYPE: Quality is still the demand for type coins. A few "plus" signs appear in this section, although not many coins are available, let alone at current levels.

GOLD: Many of the VF-AU U.S. gold coins are lower this week, as bullion continues to fall. To the contrary, some of the MS-65 coins are higher as dealers continue to search for the few available pieces.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $308.00 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem"
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (UNCIRCULATED) Struck, uncirculated—showing no evidence of rubbing or friction. However, no further qualifications are necessary. It will be bag marked and/or weakly struck, may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --end virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 - but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

GOLD AND SILVER COMMEMS TOP WANT LISTS AT FUN SHOW

Nice Dollars (MS-63 And Better) Wanted By Many

The Market in Depth

As the waiting public crowded through the doors, dealers were once again reminded of the importance of the non-dealer numismatist. The scene was the just completed FUN show in Orlando, Florida. With gold and silver bullion tumbling, a real disaster could be foreseen. To the contrary, everyone seemed eager to do business. Attendance was extremely heavy (much better than Tampa last year) and all of the over 300 dealers showed up to man their bourse tables. The aisles began filling up as the crowd started their hunt. The astute coinologist realizes that even though bullion is down, this buyer's market will not last long; only as long as supply exceeds demand. Generally, rare coin prices are holding firm, contradicting bullion. When gold and silver turn around, the rare coin market will benefit. The good buys of today will not be available tomorrow. They will be more difficult to locate. Begin your search now; be selective. Buy only properly graded and priced coins.

The majority of dealers reported having at least a good show with some calling it excellent. Nice MS-65 coins are still selling at healthy prices. At this show attention was focused on MS-65 dollars, type, and commemoratives. All denominations of U.S. gold were strong in MS-63 and MS-65 with the exceptions of $10 and $20 gold coins in MS-63 which softened. There just wasn't much available in the way of MS-65's, although many dealers were trying to locate pieces.

Original dollar rolls are still wanted and many dealers will pay above current levels. Put-together rolls were quite soft as the supply was excessive and prices cheapened as the show progressed. Many dealers are building up their supply of MS-63 and 64 dollars feeling this may be an excellent future area. It is just too difficult to locate many MS-65 dollars, so coins that are close may be the future if they are priced attractively now.

An original roll of 1912 Barber dimes surfaced and was sold at $51,000. There were approximately 35 MS-65 coins in the roll. Also changing hands was a roll of 1916-D Barber quarters. This was sold in two halves for a total of $66,000. An MS-65 1901-S $10 Liberty sold twice and the ultimate price was $4750. A gem 1911-P $20 St. Gaudens, out of a recent auction, sold for $7500.

The FUN Auction did have a number of nice dollars that sold at notable prices.

Date	Grade	Price
1879-S	MS-67/65	$ 330
1879-S	MS-67 P/L	$ 880
1880-S	MS-67/65 P/L	$ 440
1880-S	MS-67 P/L	$1705
1881-S	MS-67 P/L	$ 935
1882-S	MS-67	$1100
1882-S	MS-67	$ 825
1882-S	MS-67 P/L	$1210

Many dealers feel the rare coin market is quite separate from bullion. They point out that the month of December was terrific businesswise, some even saying it was their best December ever. The bigger volume of sales were rare coin related, which is a very good indication for numismatics. This enabled dealers to bring want lists to Florida to satisfy customer needs or try and replace inventory at lower levels.

One of the hottest topices of late has been that of alleged improprieties surrounding the American Numismatics Association Certification Service. President, David Q. Bowers, has appointed a committee to immediately investigate and make an accurate accounting of all allegations made. Hopefully they will prove unsubstantiated, which would be fortunate for all numismatics. Many concerned individuals are pleased with the effort to listen and judge fairly the allegations presented by the ANA Board of Governors. Their efforts should lead to a more congenial, accurate, and fair representation of this matter. This whole episode points out the need for ANACS to be beyond reproach in its appearance, as well as, its actions.

This Week's Market

CENTS: Buyers continue to concentrate on other areas, thus leaving the BU Lincoln series virtually unchanged for yet another week. The few changes included 1944-P and 45-P, both up agian this week, along with the 1952-P. The 1955-S roll was lower, while the 1983-S and 84-S proof rolls both increased.

NICKELS: Only a handful of BU Jefferson rolls showed an increase this past week: 1946-S, 49-S, 52-P, and 54-P, D. The rest of this series remains rather quiet.

DIMES: Original BU rolls of Mercury dimes are still in demand at present levels. There were a number of rolls changing hands in Florida at these levels. Most of the sales were for mixed roll deals of solid dates, but all were original rolls.

Roosevelt dime rolls appear quiet, although some buyers are still in the market when rolls are offered to them.

QUARTERS: Following the same pattern as Roosevelt dime rolls, BU Washington quarters remain unchanged this week. A faltering silver price has quieted the consistent bidding; be it temporarily so.

HALVES: Original BU rolls of Walking Liberty halves are again posting gains. They were extremely active at the FUN show, with many rolls changing hands. Once again, dealers are looking for original, not put-together rolls at these higher prices.

BU Franklin rolls are still trading at current levels, though most buyers have slowed their bidding and just ask to be quoted prices.

DOLLARS: There is quite a bit of weakness in common date MS-60 dollars. Availability is the reason as many dealers have a large stock. In contrast, original rolls are still being sought by many dealers thoughout the country and availability is in short supply. These rolls traded quickly at current levels this past week.

Prooflike and BU MS-65 dollars are still quite active. "Plus" signs are extensive on page 5 as many dealers attempt to buy these investment quality coins. The reason most of these coins continue to increase is that they are difficult to find. It takes a sophisticated eye to recognize an unquestionable MS-65 coin; one that you would want to purchase again and again.

A few of the Ike dollars have softened again, while the Anthony dollars remained very quiet.

PROOF SETS and MINT SETS: The 1961-63 proof sets have definitely reversed their recent upward pattern. The number of buyers has decreased and for the remaining few buyers their buys have droppcd.

The 1983-S and 84-S prestige sets have fallen as the government distributors of Olympic coinage apparently are being allowed to put together their own prestige sets.

COMMEMORATIVES: MS-65 commemoratives are once again forging ahead. Many buyers have raised their buy prices in an effort to increase their supply. Collectors and investors alike are clamoring for these low-mintage coins. With the supply of MS-65's dwindling each and every day, attempts are being made to stock up before prices go sky-high.

TYPE: Despite the fact that some dealers feel this is a very thin market, there are a number of dealers looking to constantly spend hundreds of thousands of dollars for MS-65 type coins for their never-ending needs. There were quite a few dealers in Florida running around the bourse floor, wanting to be first in line to buy the available supply of nice type coins.

GOLD: Lower bullion prices continue to hurt the U.S. gold market for VF-AU coins. This week most MS-60 coins were also lower as many dealers sell their overpriced inventory so they might restock at lower prices later. MS-65 pieces are still quite active as are many of the MS-63's.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $302.25 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (EXTREMELY FINE) Almost uncirculated showing only slight signs of wear. Some luster remains. Coin however may have further quality problems and is unacceptable to the bag marked and/or heavily struck may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same chereteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 --but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

This Week's Market

CENTS: There is very little activity to report in the area of Lincoln rolls. On the positive side are 1983-S and 84-S proof rolls. Both of these are actively sought, while there are very few recorded sales as of yet. On the negative side one will find 1953-P, 54-S, and 55-S lower. These BU rolls have been offered at lower prices.

There appears to be very little movement in prices for the 1983 D/D cent. There have been reported retail sales at $350 for gem BU coins.

NICKELS: Neglected. This area has seen very little action this week. The rolls which did trade were at lower levels; the 1950-D, was lower along with various proof rolls (1973-S, 74-S, 79-S TII, and 81-S TII.

DIMES: Trading is very light at this time. The price of silver is causing some concern in the silver roll market. Most dealers are holding back their buy prices, but sellers are not willing to sell rolls at lower prices. The one exception to this rule was the 1947-S roll which fell to $210 "bid". The only two rolls with "plus" signs were the 1953-S and 58-P. They are now "bid" at $84 and $67.50 respectively.

QUARTERS: BU quarter rolls suffer from the same condition as Roosevelt dimes. Sagging silver price. Yet, most dealers are reluctant to sell at lower levels, thus, there was only one change this past week. The 1958-P roll is lower again; now "bid" at $170.

HALVES: Original BU Walking Liberty rolls are where the major activity lies in rolls. Many dealers are searching and even raising their buy prices in order to be as competitive as possible. Usually when rolls become "hot" like this, the singles will begin to sell as some dealers put rolls together. As of yet, this is not happening, because the buyers are stressing original and are not compromising their "bids".

DOLLARS: The important activity here remains in MS-65 prooflike dollars. In most cases, one could almost name their own price for coins in this category. It must be remembered that this grade is listed as a bid range not "bid" and "ask".

Original dollar rolls are still active at current levels, while MS-60 singles remain weak.

Ike dollars do not have the strength that they appeared to be gaining a few weeks ago, although most dealers are not sellers at lower levels. Anthony dollars remain on the shelf.

PROOF SETS and MINT SETS: A couple of the silver proof sets are lower as some sellers take profits (1957 and 58). The 1961-63 sets have buyers and sellers at current levels.

The 1955 proof sets seem to be confusing some people because of the two prices. In 1955 there were two types of packaging. The box, which was used in previous years and the flat pack which was used in the following years. These two types were changed over in mid year. Many of the boxes have been thrown away and the coins placed in plastic. The $51 "bid" price represents flat packs. The $50 "bid" represents non flat pack sets. There are a few dealers looking to buy original boxed sets at $52 and up. Original boxed sets are truly hard to locate.

COMMEMORATIVES: Commems remain solid at current levels as this is one of the more consistent areas of the market at this time. As can be seen in "The Market In Depth" there are many issues which have shown a substantial gain over the last year.

TYPE: Type trading has slowed a little this week, but not from a lack of interest. There just have not been many coins available where dealers could get together on price. MS-65's are still in demand and some lesser grades are becoming more active. Some dealers have raised their buy prices on circulated type.

GOLD: As one can readily see from the gold chart on page one, U.S. gold coin premiums are still dropping. This is contrary to the fact that gold was higher this week than last. The lower premiums on VF-AU coins is also in evidence for some of the MS-60 and MS-63 issues.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $303.75 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker

ADVERTISING RATES

$35.00 per column inch, 2 column inches maximum

Advertising space is limited, ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls--dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (EXTREMELY FINE) Any moderately abrasive cleaning or dipping will be detected. However, further grading is necessary. Will have light marks and possibly strike may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOF-LIKE (CHOICE UNCIRCULATED PROOF-LIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same chereteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They renge from very scerce to unknown according to date.

Prices for single BU sets in this chert are for "typicel" coins. These usually average MS-63- -but may also include some MS-60 and MS-65 exemples. For strictly graded MS-65 single sets, use prices for individual issues es listed in the Monthly Summery. Prices for BU roll sets in this chert ere for typicel original rolls of each date and mint mark

THE BIG THREE GOING UNDER HAMMER

Original Walker Rolls Hitting Their Stride

The Market in Depth

Superior Galleries, on January 28, 29, 30, 1985, will conduct an auction which contains the Dr. Jerry Buss Collection. Dr. Buss' collection, which contains many important pieces, also houses the Big Three. The 1913 Liberty nickel, the 1894-S Barber dime, and the 1804 Bust dollar. Individually, these three coins would be the highlight of any auction. Moreover, to find these three together in one sale will radiate a feeling of excitement within each and every individual associated with numismatics.

The mystery surrounding these three coins is enough to make even the novice want to read and study the pedigree of each piece. Stories of these type of rarities are what make collectors purchase coins in the first place. These coins were a part of the creation of numismatics and sales like this one sustain the dreams of our industry.

This Week's Market

CENTS: Activity appears to have picked up recently for some BU Lincoln rolls. This activity is being seen in both buying and selling. A number of dealers have want lists for various dates, but as of yet, most remain at current prices. The latest sell prices seen for the 1983 D/D cent are as follows:

AU 50/50 - $100; AU 55/55 - $120; MS60/60 - $150; MS 63/63 - $165; and MS 65/65 - $300. These are all ANACS graded coins.

NICKELS: This area remains subdued. The only action to report is on the downside for a few dates. Included in this group are a couple of the war nickel rolls: 1943-S, now "bid" at $135 per, and 1944-S, at $230 per.

There has recently appeared a little weakness in 1937-D and 38-D BU Buffalo rolls.

DIMES: Trading has once again picked up for various dates in the BU Roosevelt series. Most bids are at current levels and are usually for 1 or 2 rolls. A few of the more active dates are: 1952-S, 1955-P, 1958-P, and 1963-P.

BU Mercury rolls remain active at current "bids" as most offers to sell are at $610 to $625 for original common dates.

QUARTERS: As with Roosevelt dimes, activity has also stepped up for BU Washington quarter rolls. A few single rolls are occasionally offered at discounted prices, but for the most part, there are buyers at current "bids" for all rolls from 1941 thru 1963. The one exception may be the 1958-P roll which has been hit by profit-taking.

HALVES: BU Franklin rolls remain quiet, although certainly not weak. Most bidders are concentrating on other areas for the time being, though most of the buyers are still "in" at current levels.

Walking Liberty half rolls are still climbing as dealers attempt to fill want lists. Many of the rolls (1940-1947) are up as much as 38% over the last 3 months. The 1941-P thru 1945-P rolls are up 28%. The 1942-D roll is up 36%. While the 1945-D roll is up 38%. Still, no quantities have come to light and there are some dealers willing to buy bags.

DOLLARS: Circulated better date dollars are beginning to appear on a number of want lists. Most of the bidding is at higher levels. Many dealers are trying to buy circ dollars at the $10.35 level for VG and better.

MS-65 prooflike dollars just keep moving skyward. These higher prices do require full MS-65 prooflike coins. MS-64 coins do not work.

Original "S" mint dollar rolls are very popular with many buyers at last week's levels and even more buyers at this week's new "bids".

PROOF SETS and MINT SETS: The silver proof sets from 1954-64 are holding their own at current levels. The 1954 and 1955 sets are marginally higher, while the 1964 set is up 75 cents to $14.25.

Also making a strong leap are 1983-S sets, up to $14.50. Availability of these sets apparently have dried up because some dealers are trying to buy large quantities and as of yet have not had much luck.

Early proof sets (1936 to 1942) are on many want lists at current "bids" and a few dealers even offer higher buys. Most dealers are being very selective as they prefer the coins to be the same quality as when they left the mint.

COMMEMORATIVE: "The Market in Depth" section shows the performance of commems over the last year. This is the conclusion to last week's update. Last weeks breather was short-lived, as "plus" signs begin appearing again. Please check page two.

TYPE: Because of a lack of fresh material higher bidding has temporarily slowed. The main buyers of MS-65 type coins are hoping to fill some of their needs this week during the two major auctions in Los Angeles, by Bowers and Merena, Inc. and Superior Galleries.

GOLD: After seemingly appearing soft last week, MS-63 gold received renewed bidding this week, demonstrating that when dealers discontinue their bidding does not necessarily mean prices are weaker. Please check the MS-63 column below for increased "bids".

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $308.00 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS 65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck ---and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63-- but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

LUCKY 13 HITS PODIUM AT $385,000

Larger Crowds; Active Bidding at Major Auctions

The Market in Depth

The auction season has begun with astounding excitement. Possibly the three most spectacular U.S. coins in history have just been auctioned off by Superior Galleries in the Dr. Jerry Buss Collection. While these three coins may not be the finest known, they are the finest available.

The 1913 Liberty nickel was the first to be auctioned. It was lot #366. There were nearly 300 numismatists in the crowded Grand Salon of the Le BelAge Hotel. The room was alive as anxious bidders fidgeted as time drew near. A last minute syndicate was developed to try and buy this lot. Pre-auction estimates ranged from $200,000 to $250,000. There were a few late arrivals who were known to covet the coin. The bidding opened at $125,000; and it never slowed. Bids were moving at $10,000 increments and there were at least a dozen different bidders. At $250,000 there were still six bidders. And at $300,000 the room was becoming louder as four hands were still in the air. Then, at $350,000 only one strong hand was in the air as the hammer hit the podium. "Sold!" The crowd cheered; the syndicate was short ("well, we tried"). The proud buyer, who already owns an 1804 Bust dollar, is a Texas collector. He is well known to the industry and was quoted, "I would have paid substantially more". So, with the buyer's fee the 1913 nickel actually sold for $385,000.

The 1894-S Barber dime was lot #617. Although the excitement was not as dramatic, it still created active bidding and commanded a respectable price. It opened at $26,000. There were a number of bidders up until $40,000. At that point two remained. At $46,000 the winner smiled. A dime's worth of history. With the buyer's fee, actual price was $50,600.

Last, but certainly not least, was the 1804 Bust dollar; lot #1337. Again, anticipation was great. The room was buzzing. The bidders were ready. The opening bid was $125,000. Again, like the Dream Nickel, bidding was competitive. Right up to the end when the hammer fell at $280,000. The crowd cheered and applauded as the new owner accepted handshakes. With the buyer's fee, total price was $308,000.

Bowers and Merena, Inc. also conducted an auction this past week in Los Angeles. When the auction began the room was full and bidding proceeded actively. Many of the coins sold on the floor, as it appears more and more collectors are returning to the hobby. This has been demonstrated as of late at some smaller, but quite active auctions, where attendance has been noticeably on the increase.

The usual auction buyers were in attendance, but as different series were auctioned, it was noticed that new bidders were getting involved. Over the past year CDN along with many of you dealers have advocated education of the numismatist. It is now beginning to pay off as the collector is becoming more comfortable with his own grading ability and knowledge of value. Sure, there may always be disagreements over grading---no two people see the same coin in the same manner. Some dealers view the assets, while some the liabilities. Nevertheless, we are moving in the direction of refinement. The longer and harder we work at it, the better off we will be in the future.

Bowers and Merena, Auction highlights:

Date	Grade	Price Realized
1879-CC $	MS-63 P/L	$ 1870
1882 $	PR-63	1870
1889-CC $	AU	1980
1892 $	MS-65	2035
1894 $	MS-63/65	1980
1793 Chain Cent	VF/XF	6160
1795 Half Dime	AU	3960
1873 Arrows Quarter	MS-65/67	4400
1881 $5 Gold	AU	1760
1856 $3 Gold	AU	2420
1874 $3 Gold	MS-63	5170

There were many other notable prices realized, but our limited space does not allow their listings. Please contact Bowers and Merena, Inc. for a copy of the prices realized.

EDITOR'S NOTE

So, you want to know what MS-67 dollars are worth---Remarkable! This past weekend a 1879-S prooflike changed hands at $2000. A 1900-O non-prooflike found a new home at $2100, while an offer of $2300 was turned down for another. And a 1890-S, also non-prooflike, was happily purchased for $3250. These are just a few examples of what one might pay for exceptional coins.

Now that your attention has been piqued, read on. An outstanding, black and white, spectacular prooflike 1880-S dollar had received a couple offers of $3500. The seller was not anxious to be relieved of this gem. But, hold on to your seat; he finally gave it up for $5000.

This Week's Market

CENTS: This week found some new bidders on BU Lincoln rolls. The activity was in the bid/ask range. The rolls wanted were: 1942-S, 46-S, and the 1934 thru 1940 "P" mint, rolls inclusive.

NICKELS: BU war nickel rolls are becoming warm again as bidders attempt to buy original roll sets. Their "bids" are near "bid" levels, while sellers remain on higher ground.

DIMES: Buyers are still looking for non-picked over BU Mercury dime rolls. They will not take put-together rolls at their buy prices.

Most of the BU Roosevelt rolls are active at current levels, with the 1953-S (new bid-$85) and the 1958-P (new bid-$73) receiving the most activity.

QUARTERS: Buyers are willing to buy all rolls of BU Washington quarters from 1941 to 64. At this point they are still looking at "bid". One of the most active coins right now is the 1939-D; rolls and singles are wanted, as most buyers state, "please quote".

HALVES: It seems that everyone is looking for BU rolls of clad halves. Please check page three for new higher "bids". The 1970-D roll is weaker at $360 "bid".

Many buyers are practically fighting each other for original rolls of Walking Liberty halves. Again, some of the rolls, from 1941 to 1947, have increased, as the others remain "hot" at "bid/ask" levels.

DOLLARS: It seems that more and more dealers are trying to purchase MS-64 dollars. Common dates readily sell at $100 each. Some buyers will even pay more. Most dealers feel this is an important grade of the future. The National Silver Dollar Roundtable advocates this grade and it is becoming more widely accepted.

There will be many dealers looking for original dollars and rolls at the always active Long Beach Coin Show this week. There will also be a major auction conducted by Kagin's.

PROOF SETS and MINT SETS: The most sought after proof set at this time is the 1964. Vast quantities are wanted and new "bid" is $14.75. There are a number of other sets wanted at higher levels. Included in these are the 1951, 1960, 1968-S, 1969-S, and overactive 1983-S.

Mint sets are not as active, although one new buyer is "in" at "bid" for original sets from 1947-1958.

COMMEMORATIVES: There is increasing activity for MS-63 commems, as most buyers are having a difficult time locating enough MS-65's. An MS-63 coin, while obviously not as nice as an MS-65, must exhibit a minimum of marks, although the strike may be a little weaker.

The silver Grant-with-star is extremely difficult to locate in uncirculated grades. Some astute buyers have increased their buy prices, which is reflected in new, higher "bids".

TYPE: The 1796 Bust quarter is extremely rare in all grades and "bids" have been responding over the last few months. The few found in auctions lately always receive active bidding.

GOLD: This week sees MS-63 U.S. gold coins quite active at higher levels. There are more and more dealers realizing the price differential between MS-63 and MS-65 is too big a spread. This is especially so, since there are so few coins available which grade MS-65.

U.S. GOLD: (Prices are for the most common date of eech type.) Bullion related gold coins in this issue are figured on a basis of gold at $302.75 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$35.00 per column inch, 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark--these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices--particularly the pre-1941 issues. Washington rolls--dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65—but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck —and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 -but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

MS-63 & 64 Dollars Wanted in Huge Amounts Throughout Industry

The Market in Depth

After covering the major auction highlights last week, CDN usually does not repeat old news; but in the case of the Superior Galleries' auction the information is pertinent and still fresh. Superior Galleries did an excellent job of publicity and salesmanship in bringing out more bidders than have been seen in recent years.

Mystery man uncovered: At the recent Superior Galleries auction at the Le BelAge Hotel, a rather dapper, western attired gentleman was seen accompanying various ladies of wealth at different sessions of the auction. He was obviously a friend of the individual ladies and was seen bidding on many lots, including The Big Three. He was the single largest buyer at the auction. One of his friends, Michelle Johnson ("Blame It On Rio" fame) purchased the 1894-S Barber dime and he was very close to purchasing the 1913 and 1804 lots.

At various times throughout the sale we tried to speak with him, but aside from a friendly hello, we did not have much success. After the sale we were finally introduced to John Doe (we were not told his real name). He still did not reveal much information as to how he came to know the several different ladies. We did find out that all the people previously described are new to numismatics; they have a genuine interest and big bucks to spend. Moreover, they like many others in attendance, were extremely happy for the buyer of the 1804 Bust dollar.

It had been rumored that Aubrey Bebee had come to the sale just to purchase the 1804. Upon overhearing his purpose at dinner--rumor was fact. When leaving the restaurant, Mr. Bebee was heard to say to his wife, "Well honey, let's go get what we came for". The Bebee's sat at the back of the room with determination on their side. And when he paid for the lot, he was so excited, he could hardly sign his check. The 1804 moves into his collection along with his 1913 Liberty nickel.

Another rarity of major significance was auctioned and received very active bidding. It was an 1879 Coiled Hair Stella in Proof 65. This coin was only minted in 1879 and 1880; it is exceedingly rare. The bidding opened at $50,000 and quickly ran up to its final bid of $95,000. With the buyer's fee the total price was $104,500.

Other Superior Galleries highlights:

Date	Grade	Price Realized
1909 Lincoln Cent	Matte PR-63	$ 341.00
1922-P Lincoln Cent	MS-65	$ 8,250.00
1866 Shield Nickel	PR-65	$ 2,750.00
1798/97 13 star rev. Dime	VF-20	$ 2,750.00
1825 Bust Dime	MS-63	$ 4,620.00
1921-S W.L. Half	MS-63	$ 8,250.00
1880 Morgan $	PR-63	$ 2,475.00
1875 Gold $	MS-65	$11,000.00
1859 Gold $2½	PR-65	$15,400.00
1876 Gold $3	PR-65	$24,200.00

As one can readily see, many expensive coins were selling in this auction. Most of the bidding was very active and many new faces were noticed among the filled auction room. There was added evidence of a new "bull market" as many visitors crowded into the Long Beach Coin Show. This is always a very active show for most of the dealers; this one was even moreso as evidenced by the few dealers that have complained in the past. They voiced having a very successful show, doing as much as four times expectations.

Generally, MS-65 coins were still active when they could be found. But quite noticeable was the fact that many dealers and thus, collectors, are looking for MS-63 and MS-64 Coins; especially in silver dollars and U.S. gold. Considering the fact that gold and silver bullion are in the dumps, this is a big step forward for numismatics.

This Week's Market

CENTS: Many of the key date Lincoln cents in all grades have now reached a level where many dealers and collectors are again interested in buying them. Some dealers are still bargain-hunting, but most sellers are holding out for "bid" on 1909-SVDB, 1909-S, 1914-D, and the 1931-S.

There have recently been a number of sellers of BU Lincoln rolls as can be seen on page three. This is the most activity seen in this area in a long time. Eventually, this may stir some buyer interest.

NICKELS: BU War nickel rolls are still active at current levels, but the rest of the Jefferson's do not share in this strength. Some rolls are lower this week while others are in a coma.

DIMES: Although most rolls of BU Roosevelt dimes are still active at current levels, there were a few sellers of specific dates at discounted prices. This is seen in the number of "minus" signs throughout this series.

QUARTERS: BU Washington quarter rolls are also a mixed bag. Various rolls are still wanted at "bid", but, there are quite a few rolls that are lower. This cannot be blamed on lower bullion prices because most are better dates which are priced at $300 or more.

HALVES: Clad halves are "hot". "Plus" signs appear aplenty for the 1965-69 rolls. Many dealers are trying to stock up on these rolls, feeling they have remained at the lower levels far too long.

The BU Franklin series is literally peppered with "minus" signs this week. Most likely, this is a result of profit-taking for some, while others attempt to reduce their inventories.

Original rolls of Walking Liberty halves are still being sought as some dealers try to fill customer want lists. New, higher buy prices have been seen for many of the 1934-47, MS-65 coins. Some dealers are not getting a fourth of what they need to satisfy their customers.

DOLLARS: Many "plus" signs appear on page five for MS-65 dollars. They were very active at the Long Beach Show as a number of dealers were looking for large quantities. For example, one dealer looked through 600 "S" mint dollars and pulled out 75 pieces of which he offered $300 each. His offer was turned down, although he later bought the 75 coins from another dealer who purchased the 600 coin lot.

The majority of the dealers (aside from the 350+ bourse tables at Long Beach, there were approximately 1000 additional walk-in dealers in attendance) were looking to buy MS-63 and MS-64 dollars. They feel, especially the MS-64, is so close to an MS-65 that somewhere along the line the gap between MS-63 and MS-65 has to be filled in.

PROOF SETS and MINT SETS: The 1964 proof set is now "bid" at $15.50. It is closing the gap between the 1961-63 sets, which are up this week to $16.50.

A few of the later date proof sets are higher as more bidders are competing for some of the cheaper sets.

COMMEMORATIVES: MS-65 commems are still moving rather nicely, thank you. Some dealers look for lustre, while others look for original color, but the fact remains, they want nice coins. The big movers this week were: Ft. Vancouver, Stone Mountain, Ark Sets 1935-37, Huguenot, Lynchburg, and Rhode Island.

TYPE: MS-65 type is very active when found. The problem here lies in that so few pieces are available. When they are offered in the "bid/ask" range they will sell immediately. The only exceptions to this rule seem to be in Proof 65 Indian cents and Two-cent pieces.

For the skeptics: Some dealers have orders for as much as one million dollars in gem type and it is difficult to locate this much material. Most of the coins being offered as MS-65's are either MS-63's or just-miss MS-64's.

GOLD: MS-63 and 65 U.S. gold is extremely difficult to locate. If a dealer is lucky enough to be second in line to look at a deal of this material, he usually has to be extremely lucky if there is any left. So go the ground rules. If strictly graded MS-63 and MS-65 U.S. gold is offered at anywhere near current levels, "he, who hesitates, is lost".

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $302.50 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same chereteristics es the MS-65--but with the additional feeture of deep mirror prooflike surfeces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --end virtuelly perfect in ell other respects. Prices of such seldom encountered specimens ere based upon the merits of each coin. They renge from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 but may also include some MS-60 and MS-65 exemples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

DEALERS INCREASE BUY PRICES FOR BIG TICKET "DOLLARS"

Late - Date Proof Sets Experiencing Renewed Activity

The Market in Depth

Over the past few years MS-65 silver dollars have continued an unprecedented climb to the top of the rare coin market. Their popularity is only threatened by their lack of availability, which is the reason for their pronounced success. Over this same number of years, many dealers have had to interpolate prices of silver dollars that were nicer than MS-63, but not quite the "65" grade. The last year has seen many dealers calling this grade MS-64.

After many hours of researching the recent price history of MS-64 dollars, CDN has compiled "bid" prices for the entire series. Keep in mind, as with all mint state grading, MS-64 will be just as precise. Also, the need for these prices is justified in order for dealers to show their customers a published wholesale price from which to work. The following is a list of "bid" prices by date.

This Week's Market

CENTS: The recent selling spree of BU Lincoln rolls continues. Another major dealer has started offering a vast quantity of almost all rolls from 1935 to date. Many of the dates offered are for fifteen rolls and more. The notable changes were seen on 1936-D, S, 1947-D, and 48-D; many others were also lower.

Recent sell prices for ANACS graded 1983 D/D Lincoln cents are: AU 55/55-$120, MS-63/63-$160, and MS-65/65-$275.

NICKELS: Some BU Jefferson rolls are beginning to slip as various dealers have offered large quantities at discounted prices. Those with lower "bids" are 1948-D, S, and 1952-S; also falling this week were a few of the late-date proof rolls: 1979-S TI, 1980-S, 1981-S TI, TII, and 1982-S.

The BU War nickel series is rather strong as many dealers are trying to locate roll sets. The most popular single rolls this week were the 1944-D, S, and 1945-P. All were "bid" higher.

DIMES: Some BU Roosevelt dime rolls are being offered at lower prices. As of yet, most are being sold immediately so "bids" remain constant. The only ones lower are the 1947-S and 1953-S. The 1959-D roll is very active at a higher bid as many dealers try to locate rolls. Many of the late-date proof rolls are lower.

QUARTERS: Recently, an original roll of 1936-D Washington quarters was purchased by one major West Coast dealer, who then allowed one of the local higher buyers to cherrypick the roll. This major dealer selected 20 coins and paid a thousand dollars a pop. It is amazing that there would be so many coins in a roll of this date to qualify as MS-65's. Moreover, the balance of the roll was not that bad; just one or two small distracting marks. The rest of the roll then sold immediately at over MS-63 "bid".

Some of the early Washington rolls are somewhat weaker as lower sell prices have been recorded.

HALVES: MS-65 Walking Liberty halves are receiving extensive buy lists at higher "bids". The 1941-45 "P" mints are wanted at a little over $200 each. The others (1934-47) are being sought also at higher levels.

A few new buyers have jumped on the bandwagon for original "Walker" rolls at current levels. This market is getting extremely competitive.

A number of BU Franklin rolls are "bid" lower this week as more offers to sell have been seen.

DOLLARS: With the recent upsurge in sales of $5000 and higher coins, there has been a noticeable increase in buy prices for rare date dollars. Although most of the rare date dollars are few and far between in MS-65, many dealers are expressing an interest at higher levels and will back up their buy prices with their checkbook. The 1879-CC is now "bid" at $5900. The 1896-O has increased to $14,500. The 1897-O is up to $6750. Aside from these rare dates, there are many other price increases on page 5.

PROOF SETS and MINT SETS: The silver proof sets are still quite strong at current levels. When sets are offered for sale they are quickly snapped up.

There are many "plus" signs for the later proof sets (1968-S thru 1981-S). Just about all of these sets are on want lists at higher levels.

The 1965-67 sms are all wanted at higher "bids".

COMMEMORATIVES: It seems that each passing week brings higher buy prices on many of the MS-65 issues. This week is no exception as a majority of the issues exhibit "plus" signs. The Isabella quarter is up to $2300; while the Hawaiian half increased to $2475. All of the Arkansas issues are higher and many of the Oregon's showed added strength.

Some of the gold commemoratives are "bid" higher in MS-65, but keep in mind, close is not good enough.

TYPE: MS-65 and PR-65 type coins continue to post gains. Full head Standing Liberty quarters are now "bid" at $1825 in MS-65. Proof-65 Mercury dimes are up to $425, while Walking Liberty halves are $850. Morgan dollars are now "bid" at $6000, but sellers cannot be found for PR-65's. Please check page 6 for additional changes.

GOLD: U.S. gold coins were steady this week. The usual dealers are still buying MS-63 and MS-65 coins at current levels when they can be found. Twenty dollar St. Gaudens and Liberties increased in MS-63. In MS-65 the $5 and $10 Indian both showed higher "bids".

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $304.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$35.00 per column inch, 2 column inches maximum

Advertising space is limited, ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (CIRCULATED) Average circulated, showing no evidence of rubbing or wear. However, no further qualifications are necessary. Will have bag marks and slight strike may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-66's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOF-LIKE (CHOICE UNCIRCULATED PROOF-LIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS 63--but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

COMMEMS STRENGTHEN IN ALL GRADES OF NEW AND USED

Dealers Battling For Large Quantities of Proof Sets; 1956 to Date

The Market in Depth

The last six months have seen a major upswing in original rolls of many series of dimes through dollars; not the least of these are all the Walking Liberty half dollar rolls from 1940 to 1947. In purchasing "Walker" rolls, one wants not only original coins, but anticipates a few MS-65 coins. The spread between roll priced coins and MS-65 specimens is large enough to compare to the silver dollar market. In fact, a year ago, common date 'S' mint dollars were "bid" the same as common date 'P' mint Walkers. We already know what 'S' mint dollars are doing ('bid' at least $300). But, Walkers have fallen behind. Yet, they are just as difficult to locate in MS-65 as dollars, although they don't enjoy the following that dollars do.

With the added interest in Walker rolls, there can be seen renewed interest in MS-65's at higher levels. The following chart compares MS-65 Walking Liberty halves from January, 1984, to January, 1985. The 1934 to 1947 issues have increased an average of 21.7% inclusive over the past year.

This past weekend saw a lot of activity in Lanham, Maryland, at the Suburban Washington, D.C. Coin Show. Attendance was heavy and some dealers reported doing more business than they have done at shows the past year. The major problem again is a lack of fresh material. When a new deal comes out on a bourse floor it will sell almost immediately, assuming the seller really wants to sell it.

Most of the activity centered around U.S. gold, silver dollars, commemoratives, and Walking Liberty half dollars. In U.S. gold dealers are buying MS-63 to MS-65. There was not much to show for MS-65 gold because of the lack of material. But there were a number of transactions for MS-63 and MS-64 coins, (especially for $2½ Indians) in $2½'s to $20's. The same can be said for silver dollars where the action was mostly in original rolls (not many around), and MS-63's to MS-65's. MS-64's received quite a bit of attention, as many dealers adjust their own buy prices.

This Week's Market

CENTS: Along with last week's weakness, this week's silence rings loudly. There are not any noticeable buyers of BU Lincoln rolls unless they are at discounted "bids". Most of the below market sells have vanished as the sellers just don't want to give the stuff away. The 1947-S and 1951-D are the only BU rolls "bid" lower this week.

NICKELS: BU Jefferson rolls are seeing some activity at higher levels after some weakness last week. The war nickel rolls are still mildly warm at current levels, with the 1942-P and 1944-S rolls wanted at higher "bids". The 1940-D, S and 55-P BU rolls are also higher this week. The 1950-D is lower in VF to MS-63 grades.

DIMES: This week has seen a few more BU Roosevelt dime rolls drop to lower levels. Most activity remains at current "bids", although the 1959-D is very active at a higher "bid" ($72.50).

QUARTERS: Most of the BU Washington quarter rolls are active at current levels with the following exceptions: 1954-S and 58-P, both higher and the 1939-P, 41-P, 41-S, 42-S, 43-S, and 46-S, all lower.

Most of the MS-65 Washington quarters from 1932 to 1941 are receiving higher "bids". These will be reflected in the March, Monthly Summary.

HALVES: The Franklin series is much like Washington quarters, many rolls are trading in the bid/ask range, but there are a few which have lower "bids" this week. Those lower are: 1951-P, D, 1952-D, and 1961-P.

Walking Liberty halves remain extremely strong for original rolls, MS-63, and MS-65 specimens. As with other series grading is very precise and the higher the grade, the more critical the eye of the buyer becomes.

DOLLARS: MS-65 Morgan dollars are "hot". Competition is strong. And dealers want the available supply. Close is not good enough. That's what MS-64 prices are for. Page five reveals many "plus" signs for MS-65's.

Carson City dollars are very strong in MS-65. Over the past few years the more common dates had been held down by the ~~false~~ belief of quantities available through the government hoard. But in reality MS-65's are very difficult to locate.

PROOF SETS and MINT SETS: There are some dealers willing to pay a few dollars over "bid" for 1950-55 proof sets if they are original and in the boxes. Almost all of the sets from 1956-64 are higher as many dealers are trying to buy the available sets. The 1961-63's are up one dollar a set and some buyers will take limited quantities at higher levels if the coins are unspotted.

Mint sets are continuing to receive constant activity at current levels. The only ones with higher "bids" this week are ~~19~~66, 66, and 67 sms.

COMMEMORATIVES: The commemorative section is spotted with "plus" signs in all grades. This area is now receiving more recordable information every day. Whereas, most buy lists in the past stated please quote, now dealers are listing their higher buy prices.

All of the complete silver sets are higher in MS-60 to MS-65. The MS-65 gold set is also higher.

TYPE: There is not much to report here, as bidding for MS-60 and MS-63 material is at discounted prices. MS-65 prices remain constant, but sales are few and far between because material is difficult to locate that meets today's grading criteria.

GOLD: U.S. gold remains active at last week's levels. MS-63 $20 St. Gaudens are higher at $900 "bid" as another strong buyer has entered this market.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion releted gold coins in this issue are figured on e basis of gold at $304.50 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (UNCIRCULATED) Strictly uncirculated showing no evidence rubbing or friction. However no further qualifications are necessary. It will be bag marked and/or weakly struck may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same charecteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63--but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

Silver Proof Sets Remain Strong In Face Of Lower Bullion Prices

The Market in Depth

EDITOR'S NOTE

Recently, there has becn a major push to accumulatc proof sets. Along with the silver proof sets (1956-64) most of the later sets have also advanced. One of the most active sets is the 1976-S 3 pc. 40% silver. They had been available from government distribution centers until recently. Now all of the centers are sold out except for the Old Mint in San Francisco. You no longer can purchase them by mail. You must go to the mint and pay $12.50 each for a maximum of 100 sets. This information came from U.S. Mint Officials and the feeling is that the supply is about to run out.

It may sound like a broken record, nevertheless, the market is extremely active for fresh material. Old, overpriced, shopped around material does not sell easily. The Mid-Winter A.N.A.Show has just ended in San Antonio. Many dealers reported having a good show, though most of the business was sporadic, not nonstop like most dealers enjoy. There was not enough new material to go around. Want lists are not being filled. Many dealers have want lists for coins totaling many thousands of dollars. Even when they raise their buy prices, they cannot purchase enough material to satisfy all the new money coming into numismatics.

Some of the major investment houses are selling 12 piece gold sets in AU to MS-63. This is creating quite a stir among dealers for fairly priced coins. The most difficult coins to locate are the smaller denominations, especially $1 and $3 gold pieces. The Type II $1 is extremely tough to find and in AU sales have been noted in the $1000 to $1600 range. Dealers may not make much money on the individual Type II, but they will profit from selling the complete set. Occasionally, when this condition exists, an issue will sell at prices above "bid" for awhile as long as the sets are hot.

A major topic of discussion in U.S. gold has always been the premium factor over melt value. It has been higher at times than it is now, but if compared to other areas of the market, such as silver dollars, the premium factor may actually be low. An original roll of BU 1923-P dollars is worth $750. Melt value is $85.50. The premium is 877%. For an MS-60 $20 St. Gaudens "bid" is $595. Melt value is $272. The premium factor is 219%. By comparing mintages and availability, along with the premium factor, one can envision the possibility of U.S. gold coins increasing in value. These facts point out the reasons for investment houses selling 12 piece type sets. The main reason most dealers stay away from U.S. gold is that it ties up too much cash in a smaller inventory. And most collectors expect dealers to sell their U.S. gold inventory at lower levels when gold goes down and keep their prices the same when gold goes up. However, over the last few months, the astute numismatist has realized that gold and silver bullion do not drive down numismatic soins. The only dramatic change bullion may have on numismatic coins is in an "up" market, as more investors try to maximize their profits.

In the recent mid-American Rare Coin Auction, there were many highlights. Some of those are noted.

Denomination	Grade	Price Realized
1895 Barber Dime	MS-67/67	$ 3,960
1895 Barber Dime	PR-67/67	$ 3,850
1908 Barber Quarter	PR-65/65	$ 3,960
1839 Seated Half	MS-63/63	$ 1,760
1871 Seated Half	MS-63/63	$ 3,080
1885 Morgan Dollar	PR-63/63	$ 2,255
1898-O Morgan Dollar	MS-65/65	$ 633
1907 $20 Gold High Relief	MS-63/63	$11,550

At the Mid-Winter A.N.A. Auction, conducted by Heritage Numismatic Auctions, the following highlights were recorded. A 1808 Quarter Eagle in AU 55/55 sold for $28,600. A like amount $28,600 was realized for a 1907 High Relief $20 St. Gaudens. The coin was graded MS-69/69 by the cataloger. Time and space limitations did not allow for justice duc to Heritage Numismatic Auctions. Please contact them for prices realized.

This Week's Market

CENTS: Again and again, one can find BU Lincoln rolls available at lower prices. Each week there seems to be different rolls offered by dealers and most go unsold. This week lower "bids" are seen for 1937-D, S, 1944-P, and 1945-P. The 1960-P small date is "bid" higher at $73 per roll.

NICKELS: BU Jefferson rolls remain mildly active, although most buys are at current levels. A handful of "plus" signs do appear for this series: 1943-D, 45-S, 50-P, 51-S, and 54-D. The war nickels are especially active as buyers seek original roll sets.

DIMES: The BU Roosevelt dime series is mixed. The 1946-S roll is higher, as is the 1955-D and 55-S rolls. On the other hand, the 1949-D and 53-P rolls are lower. The late date silver rolls are still trading actively, but in some cases at lower levels. The major drop in silver has weakened the common silver rolls along with the quarters and halves.

QUARTERS: BU Washington quarter rolls appear to have substantial staying power, although there is not a lot of activity visibly. There was not much in the way of inventory at the A.N.A. The few changes this week were on the downside. The 1950-S, 52-S, 60-P, D, and 61-P were all "bid" lower; as were the 1963-P, D, and 64-P, D.

HALVES: The recent higher "bids" for original rolls of Walking Liberty halves have managed to bring out some rolls, but quantities are limited. Usually, all the buyers can hope for are just 1 or 2 rolls at a time. There have not been any reports of large deals or roll sets trading hands. Original roll set "bid" has increased to $57,500 and there are more than just a few buyers.

BU Franklin half rolls remain steady at current levels. As with Washington quarters, there is just not much available.

DOLLARS: Although there are many buyers of MS-65 dollars, most of the recent activity is in MS-64 and lower mint state coins. Many dealers feel that MS-65 coins are too high and buyers are being too particular. But the fact remains, the buyers do purchase as many coins as are available which meet their criteria.

Most of the current transactions however, are for better date MS-60's, Carson City MS-63's, and all MS-64's. The recent pricing of MS-64 dollars in CDN has been met with tremendously favorable response. Many dealers feel that market conditions dictate this grade and that it will be used constantly. But remember, MS-64's like MS-65's are very nice coins.

PROOF SETS and MINT SETS: Proof sets are still very active as buyers continue their search for quantities. Some remain at current levels, while others have advanced, especially from 1971-S and later.

The activity in proof sets for 1936-55 is constant at current levels. Some dealers are willing to pay more than "bid" if the sets are in the original boxes and cellophane. CDN "bid" prices are for sets in any holders. One cannot expect to find many sets in original holders because of the deterioration of the cellophane and boxes over the years. But, the coins must still be nice.

COMMEMORATIVES: MS-65 gold and silver commemoratives are advancing rapidly. Many dealers at the A.N.A. show were paying just about whatever they had to in order to purchase coins. The complete 50 piece set is up $1500 this week, while the 144 piece set is higher by $4015. The 11 piece gold set increased $1875.

TYPE: MS-65 and PR-65 Copper Type coins are lower as sellers are found at discounted prices. The rest of the type market is very strong at higher levels. The only real problem here is there are very few front line buyers at these higher prices. If ones' coins do not meet the high buyers' criteria, then the next in line buyers' prices are quite a bit lower.

GOLD: In general, one can see that the AU and lower grade U.S. gold is being effected by lower bullion prices. MS-60 and higher grade material (except for $20's in MS-60) are wanted by many dealers at higher levels.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion releted gold coins in this issue ere figured on e basis of gold at $283.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$35.00 per column inch, 2 column inches maximum

Advertising space is limited, ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark--these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 - but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

"MS-64" Column Added To Dollar Charts!

The Market in Depth

YEAR: 1985

QUESTION: What does it take for a coin to command today's MS-65 "bid"?

Before this question can be answered, some background information is required. The rare coin market is in a constant state of transition. Over the many long years of collecting our forefathers have seen the hobby turn into a multi-million dollar business. In the early years coins were downright cheap. Coins were minted for circulation as there were very few presentation pieces coined. Today, those presentation pieces command astronomical prices; today, the government mints coins for the collector as presentation pieces (proofs, in large quantities). Since early coinage were minted primarily for circulation, and assuming one understands that very little or no care was taken to protect the original condition of these coins, we have our basic premise of value to build upon.

Around the turn of the century, grading was very basic; coins were either "new" or "used". Period!!! Into the 1950's and '60's it had not progressed much further except for the use of the "mint state" system by Sheldon for early copper coins.

Then into the '70's, uncirculated, which had become more technical, due to progress and the number of people entering numismatics, was broken up into MS-60, MS-65, and MS-70. That was the beginning of finite grading principles in use today, which are as strict as they will ever be, although refinements are advancing every day for in between grades. As the collector, investor, and dealer base increases the need for more refined grading becomes apparent. As the grade of coins increases, it necessarily follows that supplies are thinner and prices are higher. Today, most investors want MS-65 coins. Tomorrow, who knows . . . . .

Because grading is subjective, and no two people see coins in the same manner, what is MS-65 to one, may not be MS-65 to another. This infers that each dealer's grading criteria may vary somewhat from one another and from one series to another. It does not necessarily follow that if the higher buyers pass a coin at their MS-65 buy price that the coin is not MS-65. It just may not meet their strict criteria. The problem lies herein that if the higher buyers pass, then the next group of buyers may be at 90% of "bid". It must be remembered that this strictness of grading is a definite protection for the investor and will aid in the eventual education of every numismatist. With the advancement of grading education, it is hoped that grading will never again be as loose as it was in 1979-1981.

Now . . . what does it take for a coin to command today's MS-65 "bid"?

First and Foremost, all coins should have eye appeal. The coins must be nice. They may not have any major distractions by way of bag marks in the importantly viewed areas of the coin or discolorations. The coins may be original toned. This is very generalized, but is a good rule to follow. This does not mean it cannot have bagmarks. It's just that location is extremely important along with depth and length of the marks in relation to the size of the coin. To be more specific, the coins in each series will be described, as well as, how active the market is and whether there are many or just a few buyers.

CENTS: Although an MS-65 Lincoln may exhibit original toning, at this point in time, the few buyers require full red color. There should be no distractive marks on the face, or in front of Lincoln's face. The reverse should appear to have no obvious marks. The coin must be fully struck, although there are a few exceptions of dates which do not exhibit a complete striking. If this is the case, then the coin should appear virtually mark free.

NICKELS: The MS-65 Buffalo nickel may exhibit some light original toning, but the obverse and reverse must be fully struck. The high points (on the Buffalo and the Indian) must be scrutinized very carefully for wear. Also, look for spots of corrosion. If there are carbon spots or fly specks, the various high buyers will pass.

DIMES: Being small and bright is a distinct disadvantage of the Mercury dime. Its brightness is attractive, but it tends to show up every little mark. And buyers of this coin want it virtually mark free. Full bands should be completely split and rounded. There are many buyers of this coin at discounted prices, but only a few at "bid" levels.

The proof-65 Mercury should be fully struck. It should not exhibit any spots or hairlines. Because of past storage they may exhibit toning, but this must be original and attractive; not too dark so that the surfaces cannot be seen. This coin is quite active at "bid" to 10% off "bid".

QUARTERS: The MS-65 Washington quarter is quite difficult to grade. The number of buyers is somewhat limited so they can afford to be particular. The coin should be fully struck with a minimum of marks. The major problem here is that many Washington quarters look very nice with the naked eye. But, upon close examination with a magnifying glass, little pin marks may show up on many of the coins. The obverse does not display much detail; it has a smooth (not weak) surface. There are not many locations where bag marks can hide.

HALVES: Walking Liberty halves seem to be the second most popular silver coin behind silver dollars. It is large and enjoys extravagant detail in which minute bagmarks can hide. Nevertheless, if those marks show up in the field to the right of Liberty, or on the sun to the left, or on the reverse feathers, the many buyers of this coin will pass. Another area scrutinized carefully is Liberty herself. Besides relatively mark free, she should have some semblance of a hand (appearing split), and three-fourths of a head or more. The coin should be lustrous or may have light original toning. Dark toning will kill most sales.

As for proof-65 "Walkers", the same rules follow as with Mercuries; no hairlines or spots, fully struck, may have some light original toning. This coin is quite active at "bid" levels.

DOLLARS: MS-65 dollars are the most sought after coin in numismatics today. There are many buyers in the "bid/ask" range, with even more at 90% of "bid". These coins will be sharply struck and have full lustre. They may be toned if original and attractive. The toning should not be so dark as to hide detail or lustre. They will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. They most definitely will have eye appeal.

MS-65 prooflike dollars with the same characteristics and full mirror both sides, will command in excess of CDN "bid" ranges.

PROOF SETS and MINT SETS: These are rarely traded as a group in MS-65 or PR-65. Each coin has different characteristics and is described under the individual headings.

COMMEMORATIVES: This is a very difficult area to generalize. Unlike other series where the coins all look alike except for date and mint characteristics, commemoratives vary in design from issue to issue. Nevertheless, they should be fully struck (some issues did not strike well and appear weak). There should not be any distracting marks in the fields, although some contact marks hidden in detailing is permissible. There should be no abrasions. Original toning is acceptable, and in fact, usually brings more than does a brilliant lustrous coin of the same date. This is a very active market with many, many buyers at this time.

Gold commemoratives are described along with U.S. gold coins.

TYPE: This area could be discussed in volumnous detail and we obviously do not have the space available. MS-65 and PR-65 type coins are very popular with the educated numismatist. But this is also a very treacherous area for those that lack the expertise to buy and sell in this market. Suffice to say, grading is very strict. There are not many buyers at '65' levels. But those buyers are real. They have the knowledge and ability to deal in this area. They require hundreds of thousands of dollars worth of coins to satisfy their market. But, the coins must be nice. They have to meet their criteria. And if they are going to guarantee the sale, their criteria is of utmost importance.

GOLD: Being a soft metal, gold has an inherent problem right from the beginning. Unless U.S. gold coins were saved early after minting, it is difficult to locate them in pristine condition. Tiny marks seem to almost always appear. But, when found in MS-65 condition, these coins are readily saleable to any number of dealers. This market is sometimes puzzling because of the lack of activity as a result of coins being few and far between which meet the criteria of MS-65. This is also the case for MS-65 gold commemoratives.

As a direct result of this scarcity factor, MS-63 gold is also extremely active.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $290.50 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem"
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (CHOICE UNCIRCULATED) Will have many bag marks, may show only a slight weakness of strike. Should have full luster and are not above average in eye appeal.

MS-63 (CHOICE UNCIRCULATED) Will have few bag marks, may show only a slight weakness of strike. Should have full luster and are well above average in eye appeal.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

ORIGINAL BU SILVER ROLLS STILL ATTRACTING NEW PLAYERS

Common Circulated Silver Dollars Continue Strong Even Though Silver Still Slides

The Market in Depth

"Where are they?" That's the question most often heard lately. What are they asking about? MS-65 and PR-65 numismatic coins. Many dealers are raising their buy prices trying to locate '65' Buffalo nickels, Mercury dimes, Washington quarters, Walking Liberty halves, Morgan and Peace dollars, Type, Commemoratives (silver and gold), and U.S. gold. But, "where are they"? The quantities needed are put away in portfolios or collections. Collectors and investors know a good thing. They're not going to sell now; maybe never. What is the answer?

I.G. 63 or 64. This stands for Investment Grade--mint state or proof---63 or 64 coins. The numbers may be different, but the grading is just as precise as '65'. The burden of knowledge falls upon the buyer. He must know how to grade each series and category that he is interested in purchasing. Grading is the area where the dealer, if reputable, is obligated to educate the collector and investor. It is time consuming, but it is necessary if we are to exist longer than yesterday's profits.

Grading may seem more precise in uncirculated grades than circulated---and it is. Circulated grades have 10 point variances ranging, obviously, from high to low. For example, AU-50 to MS-60. But, if one thinks that buyers of circulated material are not as particular as buyers of mint state material, one has another think coming. To verify this, one needs to view buy messages of various dealers.

One dealer buys Indian cents in good to very fine. He lists his buy price according to date and ends his message with, "no dark, cleaned, bent, or otherwise damaged coins". Another dealer buys Seated and Barber material, Liberty and Buffalo nickels, and Indian cents. His buys repeat, "no harshly cleaned, corroded, or scratched coins wanted". He sometimes specifies "decent strikes only", when some issues may have characteristically weak strikes. Even in higher grades, dealers want clean, no fault coins. They don't want coins with heavy scratches, in fact, the main device should be relatively problem free for the grade. Dealers are tired of having to pay postage and having coins returned by the customer. This is the reason for their strictness in grading. Buy messages, like the aforementioned, appear all the time. Dealers want strictly graded material at fair prices. In fact, when was the last time you saw someone advertise to buy overgraded or damaged material? Let alone, at higher prices?

It has been some time since CDN has reported "bid" prices on Hawaiian coinage, so, here goes . . . . .

	VG	F	VF	EF	AU
1847 Cent	$ 80	$ 120	$ 150	$ 200	$ 310
1883 Dime	10	13	35	90	265
1883 Quarter	16	18	28	38	55
1883 Half	25	30	44	95	175
1883 Dollar	90	140	165	325	590

	MS-60	MS-63	MS-65	Proof 60-65
Cent	$ 700	$ 1150	Ex. rare	N/M
Dime	575	850	$ 1750	$ 2,000-8,000
Quarter	110	175	325	2,000-8,000
Half	575	850	1750	2,500-8,000
Dollar	3800	5800	8750	4,000-10,000

All of the above coins have low mintages and many of each denomination were melted. Thus, higher grades are difficult to locate. This is a very specialized area and the higher buyers are only but a few.

This Week's Market

CENTS: Most buyers of BU Lincoln rolls seek them at lower levels. Changes are minimal as bidding has been light. The BU 1960-P sm date roll is higher this week (bid $75). The most action seen in early Lincoln cents has been in strictly graded XF-mint state coins. "Bids" have been at current levels.

Recent sell prices for 1983 D/D cents are as follows: MS-60 - $110; MS-63 - $125; ANACS MS-60/60 - $140; and ANACS MS-63/63 - $155. MS-65's are noted by their absence.

NICKELS: Mild interest is now noted for many dates of BU Jefferson nickels. Most bidders seem content at current bid/ask levels, although there is special interest on most war nickels at higher levels. BU roll sets are now "bid" at a higher $2300.

DIMES: Bidding remains relatively strong for the BU Roosevelt series. Actual advances have been limited to but a handful of dates: 1955-P, D, S, 57-D, and 58-P. All have been very active as many dealers are obviously buying one or two rolls at a time to satisfy their customers. There are very few, if any, sellers at discount prices.

The Mercury dime series is very active at current levels. Sellers want "ask" or more for original rolls while buyers are many, at "bid". There are a few higher buyers, but they specify, "rolls must contain some split bands".

QUARTERS: BU Washington quarters, although no "plus" signs appear, remain steady at last week's levels. There are few discount sellers; when they do appear rolls sell rather quickly. Most of the recent buyers are not actively offering higher buy prices.

HALVES: Original Walking Liberty halves remain "hot". Increased buy prices may have taken a short breather, but many dealers are still trying to locate rolls. There are not many available, even at the recent higher levels. As with most of the BU silver rolls (dimes, quarters, and halves), sellers only have a few to offer, whereas, buyers are willing to purchase rolls by the wagon load.

Cautious bidding is noted on BU Franklin rolls. Buyers remain active at current levels, at this point resisting higher "bids". There are very few choice rolls being offered for sale.

DOLLARS: Almost every Carson City dollar is higher this week in MS-63. There has already been higher bidding activity on many MS-64 dollars.

MS-65, BU and Prooflike dollars are still climbing. Despite fear by onlookers that the prices are going too high. too fast, the bidding war continues---and no large quantities are found.

PROOF SETS and MINT SETS: The 1961-63 proof sets are up again. "Bid" is now $18.50. The amazing fact is that there are many, many more buyers at $18. It is not just one or two active buyers. The rest of the silver sets (1950-64) are very active at current levels; again with many buyers. Several of the late-date proof sets are wanted at higher "bids", with most of the others trading in the bid/ask ranges.

The same cannot be said for mint sets, as trading is very quiet. The only noticeable activity is bidding for 1947-58 at current levels---very few sales reported.

COMMEMORATIVES: As one can see on page two, gem commemoratives have not slowed at all. The higher bidders raise their buys, while the next level of buyers hang right in there. All of the Arkansas issues are higher this week, while most of the Oregon's have increased. The Isabella quarter is up to $2760 "bid" and the Hawaiian half is at $2925. The 50 and 144 piece sets (MS-60, 63, and 65) have all increased, as have the MS-63 and 65 11 piece gold sets.

TYPE: Advanced bidding has come to a halt for gem type material. This does not represent a lack of interest, only a lack of material. The high buyers have slowed their bidding only because the higher buys have not brought out more material. Most sales now fall into the MS-63, MS-64 area as more dealers venture into these grades.

GOLD: St. Gaudens $20 gold pieces are now "bid" at $2500 in MS-65. MS-65 $20 Libs are up to $3450. These definitely must be nice coins. All MS-63 U.S. gold is active at "bid" and higher. Four, eight, and twelve piece type sets are still selling as rapidly as they are put together.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $290.00 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark--these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (UNCIRCULATED) Strictly uncirculated coins with numerous bag marks, nicks or other defects. Coins are not attractive and are unacceptable for most collectors. May be bag toned and/or heavily toned. May not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full luster. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same charecteristics as the MS-65 - but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 - but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

NEW INVESTORS DEMAND EDUCATION BEFORE ENTERING MARKET

Gold and Silver Rebound Sharply

The Market in Depth

This past weekend saw two events which gives an indication of how strong the rare coin market really is today. In Anaheim, California, Howard Ruff's Financial Success Conference and Expo was very impressive and extremely well attended. The second event was a combination of many coin shows throughout the country. They all basically reported that business was very good with increasing activity.

The most notable show occurred in Scottsdale, Arizona. This relatively new show appears to be an "up-an-comer". The bourse chairman set aside 100 rooms at the convention hotel. The hotel sold over 300 rooms to coin dealers and many more stayed at other locations. This show has a "VIP" atmosphere as there are only 100 bourse tables available. Table sharing is allowed; the net result is many more dealers than tables and a lot of sales reported.

There were no complaints heard about the amount of business taking place. Everyone was quite pleased with sales, although many dealers noted that all their sales were for half dollars and higher denominations. Most of the activity did not vary from Walking Liberty halves, commemoratives, silver dollars, and U.S. gold. The show was also well attended by Mr. & Mrs. Public. There is a clear and present reality that the buying public is doing just that---buying. They are showing more awareness and a positive hunger for education.

This challenge for knowledge was even more in evidence at Howard Ruff's conference. CDN was invited to this conference to view the amount of activity that goes on in the many various areas of investments. This conference costs the attendee quite a bit more than the usual coin show admission. But, for good reason. One is offered a quick three day course on various types of investments. The learning can hardly be completed in three days, but the seeds are planted and one is exposed to the whereabouts of advanced education.

The Howard Ruff organization is extremely well versed in advertising such a conference and interest is quite apparent when one measures the thousands of people in attendance. One panel discussion was held in which four leading numismatic organizations featured representatives. The room was packed with over 200 interested people of all ages. Many questions were asked by the audience which displayed an astute awareness of reality. For those dealers interested in what the "new breed" of coin purchaser wants to know, be prepared---this is what their concerns are.

Liquidity---"How and where do I sell my coins to realize the highest profits?" The answers were: Auctions, coin shows, and individual coin dealers. The audience was also instructed to verify their purchases at the time of sale, not when it's time to liquidate.

Quality---"How do I learn to grade coins and what quality do I buy?" Most of the observers realized that grading comes through practical experience. The ones interested in buying now were told to find a reputable dealer, one they felt comfortable with. Also, one whose track record has been proven over the years and has the financial ability to remain in business. The audience was informed to buy coins of the highest quality. But, this in itself creates its own problems. There is not enough MS-65 material to satisfy all those needs. In fact, many large investment houses which sell MS-65 coins are 4-6 weeks behind on orders. This fact leads to the wisdom of buying the best available merchandise for the money.

These future numismatists realize it is their responsibility to educate themselves. They are taking that responsibility seriously and if they don't get the answers to their questions, they will search until they do. Most, if not all, realize that pricing is not the number one criteria, it is quality.

This Week's Market

CENTS: BU Lincoln cents may not be warm yet, but it seems like it's only a matter of time before some dealers begin asking for nice original rolls of most dates prior to 1950. The biggest problem with Lincoln's is that they spot fairly easily thus, causing most to be unsaleable at "bid" levels. With the use of the MS-63 and MS-65 grade, someone is bound to take advantage of this market. This week has found a few rolls in demand at higher levels. Those with higher "bids" are: 1934-P, 44-P, and 45-P.

NICKELS: BU war nickel rolls have moved from the "hot plate" to the "frying pan". Seven of the eleven rolls are higher this week as several dealers want quantities and/or roll sets. Most other dealers are looking for one or two rolls at a time. Along with the war nickel rolls, several other Jefferson rolls are wanted at higher levels. Much more interest here and this whole series could be described as warm.

DIMES: Usually a good barometer of a warming trend in a market is when there are many more buyers than sellers. Sell messages are few, except for odds and ends, bullion, or related numismatic items. Buy messages are many; they are looking for numerous specific items. The buyers vary in degree of needs. Some want just a few, while others want all of an item. This, of course, may create a monster, as the possessors of the wanted items hold out for more. This is the case for original silver rolls of dimes, quarters, and halves. There are numerous buyers at current levels for large quantities, and very few sellers, except for a single roll here and there. And when the rolls are offered, they sell immediately.

QUARTERS: Same here; not many sellers. Original BU Washington quarters are quite active at current levels. The 1958-P roll is the only BU roll higher this week.

HALVES: Original BU Franklin's are as active as dimes and quarters, with the 1954-S and 1955-P rolls wanted at higher "bids". But, the big story here is again, Walking Liberty halves. Many of the rolls from 1940 to 1947 are "bid" higher, thus, hoping to bring out some of the rolls that were put away a few years ago when rolls sold for a minimum of $4000. Nice original single coins have yet to catch up to roll prices. This is mainly because dealers specify non-put together rolls.

DOLLARS: It took quite a long time, but some dealers have finally realized that MS-63 prooflike dollars have some merit. For a number of years if a prooflike was not a '65', then there were very few dealers interested in it. All of a sudden, these same dealers have woke up to the fact that a prooflike MS-63 Morgan is a nice saleable coin. The psychology has now turned around. Obviously, not as nice as a '65', the '63' should not be compared to a '65'. The MS-63 prooflike may have minor bag marks, might be slightly weak, but will have full lustre and a deep mirror on both sides. One of the problems in the past has been, if a coin was proofkike, no matter how baggy it was, the owner would try and realize MS-63 prooflike "bid". So most dealers just stayed away from prooflikes unless they were MS-65's. Alas, the tide has turned. The MS-63 prooflike dollar is now in demand.

This week there are many "plus" signs for Morgan's from MS-64, MS-65, and MS-63 and 65 prooflike. The many shows were an indication of how active all dollars are.

PROOF SETS and MINT SETS: If one thought that proof sets were "hot", they might be considered "sizzling" now. All the sets from 1954-63 are higher this week as many dealers attempt to locate whatever sets are available. Many sets are being broken up as the Franklin half is wanted in gem condition. In fact, these sets are so strong that dealers will take sets in any holder and the coins don't have to be perfect.

COMMEMORATIVES: The problem in this series is that there are just not enough coins to go around. There has not been much in the way of fresh material on the market. The dealers are attempting to outbid each other and let everyone know they are the high buyers, just in case fresh material is exposed.

In the gold commems, a few MS-63's are beginning to liven up. MS-65's are so difficult to find that maybe dealers will try to stock MS-63's.

TYPE: Many dealers are still actively buying type in all mint state grades. Most buy messages are at current levels for MS-60 and MS-63. Most sell messages are for limited quantities and are usually within 10% of "bid". There is not as much activity actually reported for type coins as there is in some other series.

GOLD: All mint state U.S. gold remains quite active at current levels. The $5 Liberty and Indian are both higher in MS-63. The upsurge in gold bullion has brought an increase in prices of lower grade coins.

☆

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $303.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$35.00 per column inch, 2 column inches maximum

Advertising space is limited, ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls--dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (CHOICE BRILLIANT UNCIRCULATED) Will be free of bag marks and have at least average eye appeal. However, all of the other grades may have bag marks and slight weakness of strike.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same charecteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63---but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

MANY AREAS OF THE MARKET HEATING UP

Original BU Silver Rolls Remain On Want Lists

The Market in Depth

The following presentation is a price comparison of MS-65 Buffalo nickels from March, 1981, to March, 1985. As one can see, not all MS-65 coins go up continuously. The 1981 prices are an indication of the market highs, which began falling in the ensuing months. Keep in mind market conditions have forced some prices down as some dates are extremely difficult to locate.

This Week's Market

CENTS: Some dealers are offering to pay $60 per mint sewn bag of 1985-D Lincoln cents. The 1944-D and 45-D BU rolls are higher at $12 per roll. The best news is no news. There have been no reported sales of rolls offered at discount prices.

NICKELS: BU War nickel rolls remain quite active, with a few selected dates receiving higher "bids". Some of the other BU Jefferson rolls are receiving active bidding at current levels and a few at increased "bids": 1939-P, 1940-D, S, and 1946-S.

DIMES: BU Roosevelt dime rolls remain atop most buy lists. There are relatively few original rolls offered for sale, unless they are offered within the bid/ask range. Some higher "bids" were noted for 1955-S, 57-D, 59-D, 63-P, D, 64-P, and 64-D. The higher "bids" for the 1963 and 64 rolls were obviously a reaction to higher bullion prices.

Some proof only rolls are being sought with the 1983-S roll wanted at a higher $45.

QUARTERS: Again this week, as was the case last week, the 1958-P (bid-$180) is the only numismatic BU roll wanted at a higher level. The 1963 and 64 rolls are "bid" higher. Also, conspicuous by their absence, are original rolls offered at discount prices. Not many sellers here; only buyers.

HALVES: Many of the rolls (originals) of Kennedy's, 1965 to 1970, have received increased bidding for large quantities. As with other silver rolls there are not many sellers of original Franklin rolls to be found. The 1955-P roll is higher at $375 "bid".

Original rolls of Walking Liberty halves are very desireable at this time---and hardly plentiful. There are many buyers at current levels for rolls from 1940 to 1947. Also, on many want lists are strictly graded MS-65's.

DOLLARS: This week finds a number of "plus" signs for semi-better dated Morgan dollars in circulated grades. Included in this group are most of the Carson City's. Also higher are the 1882-CC, 83-CC, and 84-CC in MS-60 ($90 "bid"). Several of the MS-64 dollars are higher as a number of dealers actively pursue this market.

Some dealers have voiced concern over the rapidly advancing prices of MS-65 dollars. They feel that as this market over prices itself through strong demand for a limited supply, that prices will have to fall as dramatically as they have risen. Although their concerns may prove warranted in the long run, this has not been the case for the last 10 years. Even when the Redfield Estate was sold into the market, the supply of MS-65 coins was not enough to dilute the market. Besides, who's going to sell MS-65 dollars in such quantities that would satisfy all of the buyers at "bid" to 10% off "bid"? This is not to say that the MS-65 dollar market cannot become oversold, but with all the new buyers (dealers and investors alike) it is difficult to meet their demands. Again, bear in mind, that several investment houses are hundreds of thousands of dollars behind in orders for strictly graded MS-65 dollars.

PROOF SETS and MINT SETS: Advances are of a minor nature this week as 1961-63's only increased fifty cents to $20 each. The 1955 set is up to $55 "bid". This market is still very strong with no letup in sight. The 1968-S and 69-S sets are now "bid" up to $6 each. The 1979-S TII set is at a higher $82.

There has been recent activity for various mint sets; mostly at "bid" levels. The exceptions find 1959, 1964, and 1973 at higher levels.

COMMEMORATIVES: The MS-65 column reveals but a small percentage of price increases. This by no means is an indication of a weakening market. Commemoratives remain just as strong as they have been, only now dealers are slowing down their advanced bidding. There are plenty of dealers willing to buy in the bid/ask range for MS-65 coins. MS-60 and MS-63's have not been as active with only a few exceptions. Please check page two for current "bids".

TYPE: All MS-65 coins are not created equal. As much as the numismatic industry tries standardize grading, this precept lingers in the shadows. Which coins sell for MS-65 prices will always be determined by the purchaser. Type coins continue to bring prices in the bid/ask range when buyer and seller can agree on grade.

GOLD: U.S. gold coins are extremely strong in all grades. The circulated grades in VF to AU have increased in various denominations. For the MS-60 to MS-65 grades, there are buyers waiting in all denominations. Do not sell your coins "short" if the quality is there. There are many dealers waiting to buy at current levels.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $ 316.00 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (UNCIRCULATED) Strongly struck with overlapping evidence of rub or [illegible] are noticeably [illegible] and/or [illegible]

MS-61 (CHOICE UNCIRCULATED) Will have minor bag marks may show only a slight weakness of strike Should have full lustre These are well above average coins

MS-64 Will be sharply struck and have full lustre (brilliant or original toning) May exhibit some field distractions, but none major May have a few minor cheek contact marks Definitely nicer than an MS-63. Must have eye appeal

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning) Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date Must have eye appeal

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

Vol. XXIII No. 14 | April 5, 1985 | Single copy price: $3.50

"HEAT" OF MARKET MOST APPARENT ON BOURSE FLOORS AND IN AUCTION ROOMS

Buyers Outnumber Sellers Two To One

The Market in Depth

Is the market as hot as reported or is this activity registered only in areas where supplies are thin? To begin with, it must be pointed out that when there is a buy-sell product, the economic theory of supply and demand takes over. When supplies are thin prices go up if there is strong demand. When there is a big freeze and orange crops are sparse, prices will go up. When supplies are plentiful and demand falls short, prices will adjust downward until a level is reached which is compatible. As with the oranges again, an overabundance will reduce prices until demand equals supply. In the perishable business supply and demand must even out or there is waste. The only variable becomes price. Unlike produce, rare coins have a fixed supply. When demand is stronger than supply, prices are forced up. When demand weakens, and supplies are plentiful, then prices will retreat. And then, like produce, dealers have wasted inventory. This has been largely the case the last few years. Old inventory sits and "fresh" material sells. The last few months have seen a change in that, a lot of different products are selling (it still helps to be "fresh") and mostly at higher prices.

Today's market is much different than that of 1979-80. Back then demand was strong for "anything in a holder", no matter how it was graded. The economic condition of the world caused this outrageous demand. Greed caused this condition to worsen so that grading was very liberal. Today, collectors and investors demand education first then they will decide on the grade of the product; they will buy it if grade and price match. Yes, the liberal grading of the late 70's and early 80's did hurt some coin buyers, but today's grading standards are for the benefit of future numismatics. Dealers who complain about yesterday's business or today's strict standards are being short-sighted looking for one shot. We need progress; and the sooner, the better.

Today, there is strong demand in many areas. Collectors/investors are researching more and deciding what they want to buy. There are many studies out which compare different areas of the market (past and present). These same potential buyers are comparing other means of preserving their money. And, the rare coin industry compares favorably to all other investments. The only prerequisite is education. A buyer and seller must agree on grade. So the education must be grasped by both. The dealer is learning that the buyer wants a better coin for his or her money. And with the number of new buyers entering this field it is readily apparent that there is not enough MS-65 material to go around. Many dealers recommend MS-65's, but realize if they were going to sell only MS-65 coins, transactions would be few and far between; let alone at current levels. In order to keep a constant flow of business dealers must recommend less than MS-65 coins. Then it's up to the buyers to select those issues which may have a greater degree of difficulty in obtaining.

Yes Virginia, the market is "hot"; for those dealers who go to auctions and coin shows and those investment houses which have large advertising budgets. The local coin shop may be tired of hearing about the "hot" market because they only cater to their select clientele and most of them just buy bullion (gold and silver). This may be another problem area as most retail coin shops do not see the volume of trading that goes on in MS-65 material at coin shows or through investment houses. They may be restricted as to availability and not realize that grading is more strict today than 2 to 4 years ago.

Many dealers have reported over the last 6-8 weeks that they have sold more than they have bought on a week to week basis. Their inventories are declining by quantity not value. This is a major sign of a bull market; the consistency is readily apparent. As previously reported some major investment houses are 4-6 weeks behind in satisfying orders. These represent negative inventories for confirmed sales. Most of this activity had been occurring prior to gold and silver making a strong run. Add to this the possibility of savings institutions failing and it follows that potential buyers will look to the rare coin business for a tangible product in which to invest. Now all they need is an education in order to buy the product.

CENTS: With the exceptions of 1952-P and 1970-S sm date (both higher) BU Lincoln rolls remain unchanged this week. Considcrable interest does remain evident, however, for several of the 1945 and prior rolls. The current demand is in the bid/ask range.

NICKELS: There are several "plus" signs throughout the BU Jefferson nickel series. Most of the current activity remains in the 1945 and earlier rolls. A few of the war nickel rolls are higher again this week as the potential buyers seek original rolls. The war nickel roll set, with all original rolls, appears to be extremely difficult to locate.

DIMES: Advanced bidding for original BU Mercury dime rolls has not occurred for some time. Nevertheless, when rolls are offered they are in the "ask" range. Bargain-hunting is attempted, but with no reported success.

While trading remains light (there is a pronouned lack of material), interest is quite high for BU rolls of Roosevelt dimes. several rolls have edged higher as a number of dealers seek to satisfy want lists. The rolls wanted at higher "bids" are: 1948-S/$315,1954-S/$83.50, 1955-P/$118, 1957-P/$51, 1958-P/$78, and 1958-D/$53.

QUARTERS: Early Washington quarter rolls are not traded very often. It is usually more beneficial to break up the rolls and sell whatever coins make MS-65 and then sell the balance as a partial roll. Usually, bidding for early rolls is at bargain-hunting prices. Activity is constant for rolls (1942-64) when they can be located. The 1954-S and 58-P rolls are the only ones wanted at higher levels at the moment.

HALVES: Walking Liberty halves are again receiving numerous "bids" for original rolls from 1941-47. Not all rolls are higher, but all are wanted at least at current levels. The 1941-45 "P" mints are now "bid" $2100 per roll.

The Franklin series is still receiving active bidding at current levels, although like other BU rolls, there are not many to be found. The 1955-P remains strong at $385.00 "bid".

DOLLARS: Original BU Morgan dollar rolls are receiving numerous "bids" at "mid bid/ask range" to "ask". Thcse dealers are making a concerted effort to buy original material. There has been a definite lack of original rolls on the coin show circuit at what might be termed reasonable prices. When original rolls are offered, they frequently sell at "ask" or above.

Even though the higher buyers of MS-65 dollars are considered fussy by most other dealers, this is not necessarily true. They have exacting requirements of what an MS-65 dollar should look like. There are no problems with undeniable MS-65 dollars! The problems arise for borderline MS-65 coins. They must meet the characteristic appearance of that particular buyer. The coin must meet his "eye appeal" description. One mark in the wrong place can be the difference between MS-64 and MS-65.

Ike and Anthony dollars are beginning to show consistent strength at current levels. There are not many advances as of yet, but when lots are offered at discount prices, they quickly sell.

PROOF SETS and MINT SETS: The story is the same: Proof sets up again (1956-63). This week 1940-42 have been added to the list. The only requirement is "nice no hairlines on the Mercury dime and Walking Liberty half".

COMMEMORATIVES: This markct does not seem to slow down at all; not even to catch its breath. There are many buyers at higher levels and the rest of the major buyers are not far behind, if at all. Please check page two for the numerous changes.

TYPE: There is another series of price increases for some MS-65 type coins. Several dealers are actively pursuing the available supply of nice coins. This is also seen in Proof-65 coins. A couple recent auctions bear this out, as prices for gem coins were in excess of current levels.

GOLD: With rising bullion prices U.S. gold coins in VF-AU are on the move. MS-60 - MS-65 gold remains extremely activc as buyers continue to outnumber sellers. In recent auction sales an 1841 ½ Eagle brought $30,800 in MS-65 while an 1858 gem proof ½ Eagle sold for $50,600 (only 5 known).

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $318.00 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark--these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices--particularly the pre-1941 issues. Washington rolls--dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (UNCIRCULATED) Strictly uncirculated condition, but may have some of rim or edge nicks. However no further grade restrictions are necessary. May have bag marks and or wheel grade may have light toning.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

END OF YEAR CLEARANCE SALE

The time has once again arrived for me to clean out some of the lock boxes before inventory. I spent almost the entire week between Christmas and New Years doing this and the following is just a partial list of the singles I have in stock and available. As you all know, I deal mostly in Ch. BU Original rolls, but I also do quite an extensive amount of business in choice and or rare singles

As usual, we guarantee each and every coin for authenticity and for accuracy in grading. If for eny reason at all you are not satisfied with the coin you purchase, I will refund your entire purchase price, no questions asked.

Some of the following coins already have ANACS certificates for grading or authenticity and in many cases for both grading and authenticity. However, do not let the fact that a coin does not have the certificate keep you from taking advantage of these extra low prices. As those of you that have ordered coins from me in the past are already aware, my grading standards are among the highest in the numismatic field and you can buy with confidence from me.

The following pages have scores of bargains on them. Read each one, so as not to miss out on anything you might wish to add to your collection or your investment portfolio.

ALL COINS WITH ANACS CERTIFICATES WILL BE MARKED WITH AN ASTERISK NEXT TO THE GRADE. IF IT DOES NOT HAVE AN ASTERISK THEN IT IS MY GRADING, WHICH YOU ALL KNOW BY NOW IS EXTREMELY STRICT.

*Denotes ANACS Certification & Grading

We just purchased two rather good sized gold collections and are happy to be able to offer some of them to you at extremely reasonable prices. As usual we guarantee the authenticity and the grading of the coins with your complete satisfaction guaranteed. If for any reason you are unhappy with the coin or coins you order, you may return within ten days and receive a full refund of your purchase price. BUY WITH CONFIDENCE. I PERSONALLY GIVE YOU AN UNCONDITIONAL GUARANTEE ON EACH AND EVERY COIN WE SELL.

There are some eight pc. and some twelve piece gold type sets in both of these estates. They contain the following coins.

Eight Piece Set	Twelve Piece Set
$2½ Indian	$2½ Indian
$2½ Liberty	$2½ Liberty
$5 Indian	$5 Indian
$5 Liberty	$5 Liberty
$10 Indian	$10 Indian
$10 Liberty	$10 Liberty
$20 Saint Gaudens	$20 St. Gaudens
$20 Liberty	$20 Liberty
	$1 Type 1
	$1 Type 2
	$1 Type 3
	$3 Gold pc.

Each set will contain the specified number of coins as indicated above and all coins will be exactly and accurately graded. In other words, an XF set will contain all coins grading Extra Fine or better. The AU set will contain all coins grading Almost Uncirculated or better, and so forth. I believe U.S. Gold is at the bottom of the slump and gathering strength for a very big and volatile jump upward and now may just be the bargain time for U.S. Gold.

Set	EF	AU	MS-60/60	MS-63/63
Eight Pc.....	2,900.	3,170.	5,450.	11,750.
Twelve Pc....	4,250.	5,245.	12,595.	24,500.

There were also some complete sets of $2½ Indian Gold pieces in these estates and we are offering them at these unheard of low, low prices.

Complete sets of 15 pieces. This will be one of each date and mint $2½ Indian minted by U.S. Gov't.

EF	AU	MS-60/60	MS-63/63

There were also by some streak of luck one roll each Ch. BU original 1946-S and 1947-D Walking Liberty Half dollars. We will sell these for $2595.00 for the 1946-S and $3175.00 for the 1947-D roll.

MS 65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63---but may also include some MS-60 and MS 66 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

MS-63 Dollars Being Touted By Many

The Market in Depth

EDITOR'S NOTE

The Monthly Summary contains one of the best articles ever read by this writer. It is on MS-67 dollars by Bruce Amspacher. This same article may also apply to many other series and grades. His in-depth feeling and analysis of the overall rare coin industry is readily apparent. Be sure to read it in this week's April Monthly Summary.

Is the hobbyist (collector) dead? No, but he is no longer the base of the rare coin market. The collector, was and still is, the heart and soul of numismatics. Nevertheless, higher prices have slowed the ability of the collector to complete a particular set or series. Higher prices have stunted the growth of the youth movement into the hobby. Thus, higher prices, and the profit motive have changed the hobby into a profession. This is not to say, that earlier numismatists were not professionals. They were a different breed—"The fathers of numismatics". They had a love for the study of coins. Today, it's a cold, hard world of profits, profits, and more profits. Although higher prices have slowed the collector, these very same prices are the reason more and more investors are entering our industry.

The rare coin industry is in the throes of tremendous expansion. The basis for this expansion is education. The major leaders of our industry expound upon education every day. The amount of your schooling is only limited by your pioneering spirit. Today's students are tomorrow's experts.

The American Numismatic Association Certification Service (ANACS) has come a long way in the last couple of years to lend more credibility to the rare coin industry. ANACS can be used as an educational tool to learn grading and authenticity. For their services, ANACS charges a fee. To keep them unbiased, they do not buy or sell coins, so the certificate is not a guarantee. The guarantee must come from the dealer who buys and sells coins and puts his reputation on the line. Any guarantee (in any industry) is only as good as the company behind it.

To show how far our industry has come in the last two years alone, it can be pointed out that ANACS graded coins are very popular. Coins graded in the last two years are seeing offers to buy at "bid" to 90% of "bid" for almost all MS-65 coins. For earlier graded coins, offers might be discounted according to quality. These facts reveal the consistency for which ANACS is striving.

There are a number of other less notable certification services, but most dealers do not rely on their certificates as strongly as they do for ANACS coins. Most other certified coins are normally discounted. Along with the certification services offered by some companies, there are a number of prominent companies that offer buy/sell guarantees. This is definitely a step in the right direction toward overcoming the subjectivity in the grading of rare coins. When companies will buy other company's guaranteed buy-back coins at current market, we will have overcome subjectivity entirely.

This Week's Market

CENTS: Whatever interest there is in BU Lincoln rolls cannot be seen in price changes this week. Prices among the 1934-to-date issues are unchanged. Bidding is infrequent and trading volume must be termed light at best.

NICKELS: As with Lincoln cents, BU Jefferson rolls are not receiving much in the way of higher "bids". The 1944-P roll is higher at $165; the 1984-S proof roll has increased to $33 "bid". There is active bidding at current levels for 1940-P, 41-P, D, S, 50-P, 51-P, D, and S.

After last week's higher "bids" for some of the BU Buffalo rolls, this week they remain unchanged---with very few available.

DIMES: BU Mercury dime rolls are not receiving constant bidding, although one major buyer will take any and all rolls of 1934-45 at current "bids".

The Roosevelt dime series remains strong at current levels, with a few receiving higher "bids". The more active rolls are 1953-S (bid $85), 1954-S (bid $85), 1958-P (bid $80), and 1959-D (bid $76). The 1964 proof roll is up to $50 "bid".

Various MS-65 FSB Mercury dimes are higher in the Monthly Summary. Most of the "P" mints from 1916-29 are higher along with some scattered mintmarked pieces. As reported a few weeks ago, Mercury dimes must be exceptionally nice to command the higher "bids". It seems one major buyer is dominating this market.

QUARTERS: Many of the issues from 1932-39 Washington quarters posted gains this month in MS-65. The 1932-P is $335, 1934-P is $100, 1935-P is $70, and 1936-P is $70. Various mintmarked coins also increased; please see The Monthly Summary.

BU rolls of Washington quarters remain active at current levels, with most buyers concentrating on issues dated 1954 and later. The reason these are more actively sought is simple: There are more available, even if it is at higher prices.

HALVES: MS-65 Walking Liberty halves are noticeably higher, as several buyers will take quantities of the 1934-47 issues. Many of the earlier dates are also on want lists at higher levels. Original "Walker" rolls remain quite active as buyers cannot seem to find enough.

BU Franklin halves, by the roll, are still difficult to locate in quantity. The 1954-S and 55-P both realized gains this week. Occasionally, some dealers will offer mixed lots of single coins at a little back of "bid".

Apparently some dealers have realized that the specialty rolls of 40% silver were under priced. These rolls have been on the increase lately (1965 and 66 sms, 1968-S and 69-S proofs).

DOLLARS: At the Harvey's Invitational VIP coin show this past week, seven of the country's most active silver dollar dealers participated in a sealed-bid purchase of single coins from John W. Highfill's personal silver dollar collection. There were many extremely nice coins available. Bidding was competitive and there was a very narrow range. The higher buyer's high bids were just strong enough to buy 20% of the coins he bid on. The other dollar specialists must have felt that some dates are underpriced and outbid him for the remainder. The following is a partial list of coins sold and prices realized.

Date	Grade	Price
1882-S	MS-65 P/L	$ 850
1883-P	MS-67	$1000
1888-O	MS-65	$ 630
1898-O	MS-65 P/L	$1000
1903-P	MS-65	$ 800
1925-P	MS-65	$ 520
1880-P	MS-67	$ 900
1898-S	MS-65	$1600
1883-CC	MS-67	$ 750
1878-CC	MS-67	$1000
1897-S	MS-65 P/L	$1300
1892-CC	MS-65	$1950
1935-P	MS-67	$1625

In the Ike dollar series there is beginning to be more activity. But remember, any, is more than there's been for a long time. Buyers are attempting to stock up on some of the cheaper issues. There is a lack of communication on the part of some dealers as their buys and sells overlap. Consequently, (1974-S Brown Ikes) prices remained the same.

PROOF SETS and MINT SETS: It looks like advanced bidding has slowed down on many dates. Whether this is temporary or not remains to be seen. There were still many active bidders at current levels, so no body is selling at discount levels as of yet.

Activity for mint sets remains light, although the usual bidders will still take quantities at "bid".

COMMEMORATIVES: Commemoratives, once again are at the top of most dealers' buy lists. As can be seen on page two, price is no barrier; quality and quantity are the real problems. Most commem specialists are "in" for just about any issue in strict MS-65 condition at anything near current levels. Not only that, they will take quantities. For those of you who may think MS-65 commems are going too high, keep in mind low mintages AND the 144 piece set in MS-65 is only "bid" 2.8 times as much as the same set in MS-63. By comparison, many MS-65 dollars are "bid" 8-10 times the MS-63's.

TYPE: To give one an idea of the value of low end type coins, which are not listed in the CDN, the following is a listing of offers to buy. These can be good rejects, AG to G, and G and better with minor problems.

Half Cents — $5	Large Cents — $2
Two Cents — $1.25	Three Cents — $1.25
Shield Nickels — $1	Half Dimes — $1.50
Flying Eagles — $1.50	Seated Material — 8 x Face
Bust ½ Dimes — $2.50	Bust Dimes — $2.50
Bust Quarters — $12	Bust Halves — $7.50
Twenty Cents — $12	Trade Dollars — $18
Seated Dollars — $25	Bust Dollars — $100

GOLD: After a little breather, mint state gold is once again showing advanced bidding. Various denominations in MS-60, 63, and 65 show increased buys, while the others are in just as much demand, only at current levels. In most cases, advanced bidding just raises the price an owner wants for a particular coin. The owner usually wants "ask" if not more for properly graded coins.

The circulated grades (VF-AU) are again showing strength. Please check below for numerous advances.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $325.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$35.00 per column inch, 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark--these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices--particularly the pre-1941 issues. Washington rolls--dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (UNCIRCULATED) Strictly uncirculated, showing no evidence of rub or wear, however no further qualifications are necessary. It will be bag marked and/or possibly prefix. May not have full lustre.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

How to buy today's best gold at today's best price.

Double Eagles may be the hottest coin in today's market. Everyone seems to be realizing that the Double Eagle not only is an excellent way to own gold, but is also a way to get a glimpse of the past, and to open the door to the enjoyment of collecting.

Let us introduce you to Heritage quality with these specially priced Double Eagles

*The Liberty Double Eagle in MS 63/65 is an excellent buy at the introductory price of $1,450.**

*The St. Gaudens MS 63/65 Double Eagle is specially priced at $1,400 just to introduce you to Heritage.**

Because of the increasing interest in Double Eagles, quality coins are becoming more difficult to find. It was the challenge of locating top quality that we gave to our European buyers, and they were able to secure a small supply of MS 63's, MS 63/65's, and a few MS 65's.

To introduce you to the quality and service of Heritage, we've specially priced our limited supply of Double Eagles in all three grades. But it seems that the MS 63/65 is the most popular.

These coins are a cut above the commonplace MS 63's, and exhibit an abundance of luster and minimal marks. Their condition is so close to the MS 65 level, that perhaps the untrained eye might mistake them for the higher quality.

This small supply of MS 63/65's are priced at the introductory level of $1,400 and $1,450 each for the St. Gaudens and Liberty respectively. (MS 63's and MS 65's are also specially priced, just call for prices.) Please realize that these prices will be maintained for you until either the market changes or until the supply is exhausted.

Take advantage of this special introductory offer to buy today's best gold at today's best price. Call Heritage toll free at *1-800-US COINS*. You'll not only receive top quality and top service, but also one of the hottest coins in the market at a great price. Call today before supplies are exhausted!

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65---but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck ---and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63---but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

Proof Sets. Will They Stick?

The Market in Depth

The last few months have seen millions of dollars in activity for proof sets from 1936 thru 1963. This has created an exciting market for proof-65 coins. The CDN "bid" for 1936-1984 proof sets is for average sets. The 1936-1955 sets can be in any type of holder. 1955 flat packs thru 1984's should be in the original government holder. Now, at this particular time, buyers for the 1956-63 sets are not very fussy. They will take any set in any holder; they can be less than average quality.

It might be beneficial to look at the manner in which these sets (1956-63) are being sold. To keep this price analysis simple, we will use the 1961-63 sets only. There is one company, which we will call "Company A", that will pay $24 for the proof Franklin half in PR-65. The coins must be nice, with no hairlines, spots (carbon or white), nicks, or toning. Company A claims a 15% to 30% purchase rate of all cello sealed sets sent to them. Our sources indicate this is a little high as the rate is closer to 10%. Needless to say, for the prices paid, they are allowed to use a 5 power glass and a high tensor lamp. So, if one had sent Company A 100 sets, it is likely that as many as 90 would have been returned.

Now, if one sends those 90 sets to the next highest buyer, Company B, this company will pay $22 for each "gem, spot-free set". Company B claims they keep 30% of the sets sent to them. Again, our sources indicate it is closer to 20% to 25%. The balance of the rejected sets can be sold to any number of buyers in the current bid/ask range.

By the time all is shipped and paid, the original owner of the 100 sets has invested 30 to 45 days and made about 3% more on his money after shipping charges. Albeit, 3% per month isn't bad, but what if Company A and B do not buy as big a percentage. Then a lot of your time and profit is lost. And, what if one breaks up the sets and tries to sell just the halves to Company A. Let's say Company A still buys 10% at $24 each. There are now 90 singles left and the next highest buyer is at $17 each, thus, creating an unprofitable situation. As one could surmise, many dealers don't waste their time sending the sets around the country. This makes it quite difficult for Company A and B to satisfy their multitude of orders. As one can see, this is the reason Company A and B have raised their buy prices at such a constant rate. They just cannot find enough material.

As an added footnote to this dissertation, about 97% of all dealers do not use a magnifying glass on proof sets. (They usually don't use one at all for grading. This may have been okay in the past but with the advent of the "grading renaissance", it is a necessity today. The ANACS uses a 7 power glass and an incandescent lamp for grading and many dealers are actively buying and selling ANACS graded coins at current bid/ask prices.) About 90% of all dealers believe that proof coins in the original government cello are PR-65 or better. This is not true. Because of mishandling or improper storage, these coins may develop hairlines, carbon spots, white spots, or unattractive toning. There may be a weakness of strike. Any of these conditions may cause the coins to be graded less than PR-65. So, let's be careful out there.

This Week's Market

CENTS: There are a few individual Lincoln rolls on want lists at current levels, but as a rule, prices and activity remains stagnant. When one sees constant activity in this area, it will be apparent that the whole market is "hot". Until this occurs, only selected areas of numismatics along with specific grades (choice, gem, wonder), are the heat of the market.

NICKELS: Here again, like Lincoln rolls, BU Jefferson rolls are an overall indicator of the market. Although, unlike Lincolns, a few specific rolls are constantly on some dealers' want lists. Occasionally, these dealers bump their bids slightly, but for the most part, they drop back to current "bid". The bidders want bright, better than average rolls and in some cases are bidding for rolls that are only found "dark".

The BU war nickels are steady at current levels with the 1944-P, the only one higher at $175 "bid". Several other Jefferson rolls are higher this week (1952 and prior), but all rolls are soft after 1955.

DIMES: "Plus" signs are scattered throughout the Roosevelt dime series. Recently, dealers had been trying to buy rolls at current levels, but to no avail. Now they feel, in order to stock up on these rolls, they must raise their buy prices. In the recent past, one could always find any number of roll deals to buy at coin shows. Lately, these deals consist of only a very few rolls.

Various Mercury dime rolls are once again showing activity at current levels. The 1940-S roll is "bid" higher at $750. Rolls must be original; put together rolls do not work at these levels.

The 1982 plain dime (full strike) is available in MS-63 and MS-65 at lower levels.

QUARTERS: Washington quarters are once again atop many want lists at higher levels. Like the Roosevelt dime series, there just are not many original rolls available. The "P" mint's from 1943 to 1946 are all higher this week. Most dates from 1951 thru 1958 are also higher. The later rolls (with "plus" signs) are all "bid" at $200 or less. The 1943-46 "P" mint rolls are "bid" $270 and under.

HALVES: BU Franklin half rolls, although not plentiful, remain active only at current levels. There are not many conspicuous sellers at discount prices, unless it is for one or two rolls at a time.

Strong bidding continues for gem MS-65 examples of every Walking Liberty issue from 1934 thru 1947. Current buyers are sticking with the bid prices recorded a couple weeks ago, but reports indicate that the desired quantity of coins has yet to be located at these levels. It should be stressed once again that it takes a top quality piece to bring the price on today's market.

DOLLARS: Today's more refined grading has not only hit MS-65 coins, but all other grades as well. From MS-65 down to as low as VG coins, one description that always shows up is, no distracting marks. Now, we find dealers looking for "clean cheek" MS-60 or MS-60 and better Carson City dollars. Sounds like a distracting contradiction.

This week finds a number of dealers raising their buy prices for MS-63 and MS-64 dollars.

PROOF SETS and MINT SETS: Advanced bidding for proof sets has come to a standstill. Most sets remain tradeable in the bid/ask range. The only difference now is that some sellers do appear in these ranges for specific lots. Keep in mind, there is no need to discount sets at this time.

Mint sets continue at their same nonchalant pace. Many buyers at "bid", but not real active. The 1955 and 1960 sets did increase this week.

COMMEMORATIVES: There have been isolated recommendations for specific issues of commemoratives in MS-60 and MS-63. This is sometimes the case when MS-65's go up so fast or if MS-65's are difficult to locate because of characteristically weak struck specimens. In any case, there are a few "plus" signs on such issues. In MS-65, the Isabella quarter and Lafayette dollar are again higher. These two coins in particular, are almost impossible in MS-65.

TYPE: There were no changes registered in mint state or proof type this week. The active higher buyers are able to fill their needs at current levels.

GOLD: This is one of the areas that is getting increased activity. MS-63 and MS-65 coins are in demand and possessors can just about name their own price. More than half of the issues are at higher levels this week as can be noted at the bottom of the page.

Circulated U.S. gold is strong in VF-AU as bullion gold hangs in at the $329 level.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $329.00 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-63 [illegible] MS-63 (CHOICE UNCIRCULATED) Will have [illegible] bag marks, may show only a few [illegible] weaknesses of strike. Should have [illegible] Does not have above average [illegible]

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

CERTIFICATION—GRADE—PRICE*

GUARANTEED!!!

IT'S OUR PROMISE!

The Rare Coin Exchange's MARKET PRICING CERTIFICATE is the *only* certification system that guarantees specific and legitimate buy prices with grade so you can know what to price your coin *now and in the future.*

HOW DOES YOUR CERTIFICATION SYSTEM EQUATE TO PRICE? *A simple two-step process:*

First, we identify (certify) your coin with a unique pricing signature. We combine the traditional numeric grade with the five market-related characteristics of *appearance, mark, strike, luster and color* into a **Market Pricing Profile.**

Second, your coin's unique pricing signature lets traders of the **Rare Coin Exchange (RCE),** adapted from principles successful on the securities and commodities exchanges, buy your coin sight unseen, yet in a free, visible, open market ensuring fair price.

HOW DOES CERTIFICATION TELL ME THE PRICE OF MY COINS?

Bid-ask ranges of certified coins traded on the RCE reflect *real* transactions.

WHAT ABOUT ITS FUTURE PRICE?

No more guesses or indicated prices that may differ from reality by 50% or more. Your coin's **Market Pricing Profile** lets you track price, and know within very close tolerance its liquidation value *any time in the future.*

HOW LONG WILL IT TAKE TO CERTIFY MY COINS?

Five days! That's the fastest turnaround time in the industry.

WHO CERTIFIES MY COINS?

A team of experts, each with a minimum of ten-years industry experience, provides your coin's unique pricing signature.

SPECIAL INTRODUCTORY OFFER: *50% OFF!*

Send two to ten coins (limit 10) to us for certification, and we'll certify them for half our regular fee. Minimum $25. Please see reverse side for details. Offer expires June 1, 1985.

For more information about The Rare Coin Exchange and the Market Pricing Certificate, call or write Mary Thompson, The RCE, 1423 W. Fullerton Avenue, Chicago, IL 60614. Call ***toll free 1-800-621-1339.*** Illinois residents please call ***312-549-2227.***

*Guaranteed price is for RCE-traded coins only.

HOW DO I GET STARTED?

Simply, fill out the request form on the reverse side and send in your coins to be certified today.

THE INNOVATION OF THE DECADE IS BACK!

And more profitable than ever!

Leveraged Rare Coin Investment Portfolios™

In September 1982, Hannes Tulving Rare Coin Investments, in cooperation with West Coast Bank of Encino, California, announced America's first **Leveraged Rare Coin Investment Portfolios.™** Scores of far-sighted individuals took advantage of this unique buying opportunity. Two years later, *all participants* showed a profit — after all interest payments and service charges!

Now, HTRCI is proud to announce a new, even more attractive rare coin leveraging program. Arranged through one of the Southwest's leading federally insured savings banks, this unique program allows our clients to double their purchasing power at an interest rate even lower than before!

Never before have investors had such an opportunity to increase the profit potential of their rare coin portfolios!

Here's How It Works:

Example: With $10,000, you can purchase $20,000 worth of rare coins with our bank loaning you, the client, the difference of $10,000. The entire portfolio is held by the bank as collateral on the loan.

This concept has three key attractions for the investor:

- **The chance to reap greater profits on rare coin investments.**
- **Interest write-offs.**
- **Freeing-up of other collateral; only the coins themselves are held against the loan.**

Since we opened our doors in 1976, clients of HTRCI have enjoyed an average annual profit of 25 percent. Such profit potential coupled with the additional buying power available through our Leveraged Rare Coin Investment Portfolios,™ make investments through HTRCI an outstanding opportunity.

Unique In The Industry

Hannes Tulving Rare Coin Investments is the *only* rare coin investment company offering leveraged rare coin purchases. Our cooperating bank recognizes our grading and liquidation programs as the industry's best; our coins therefore meet their collateral requirements *in all instances.*

This means HTRCI clients can not only leverage their rare coin purchases, but can use their portfolios as collateral for cash loans through this federally insured savings institution!

No other rare coin company can offer investors such flexibility!

Build Your Dreams Through Us

Here's a chance to build your financial dreams through the most comprehensive and profitable investment programs available anywhere. In addition to our one-of-a-kind leveraging programs, we offer:

- A guarantee to repurchase your coins at the same grade at which they were sold for a minimum of wholesale "bid" as reported in the most recent *Coin Dealer Newsletter.*
- Computerized updates every six months on the performance of *every coin* in your portfolio as well as total portfolio performance broken down on a percentage basis.
- A conservative approach to rare coin investing that ensures client profits. To date, *not one* client has ever lost money with an HTRCI portfolio.
- Access to personal consultation with Hannes Tulving, president, grading consultant to ANACS and author of numerous articles on rare coin investing.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same charecteristics as the MS-65 --but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 --but may also include some MS-60 and MS-65 exemples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

MANY MAJOR DEALERS SHIFTING CLIENTS TO MS-63's AND MS-64's

"Central States" Prepares for Major Activity

The Market in Depth

Not only have grading standards tightened in the last year, but supplies of variously graded material have definitely begun to dry up. We are in a truly responsive market and if buyers need material for their customers (and this material is of the desirable nature) the only way to locate enough material is to raise their buy prices. This is by no means a guarantee that the "hot" areas of the current market cannot fall, because what goes up can just as easily come down--even harder and faster. But, consider for a moment the fact that there is not a better place for investment capital than with properly graded and priced rare coins. There are at least twice as many investors/collectors aware of this fact today, than there were four years ago. This alone depletes the available supply. Also, as prices increase most investors/collectors are reluctant to sell because they cannot replace their holdings. So as prices go up, it does not necessarily follow that more material will come on the market.

To take this one step further, let's use the August 6, 1982 CDN. An 1880-S silver dollar in MS-65 was bid at $100. Today, a stricter graded specimen is bid $350. (Not all of the 1982 MS-65's meet today's rigid "grading renaissance" standards. On the other hand, all MS-65's, at one time or another, sold for as little as $1.25 each.) Now I pose these questions. In 1982, would you rather have had a $100 bill or an 1880-S dollar in MS-65? Remember, in 1982 supplies were much more plentiful. Today, would you rather have $350 cash or a strictly graded 1880-S MS-65 silver dollar? There are no correct answers because you are not comparing the same items. For that matter, $350 today is not 3½ times $100 of 1982 money. Your buying power is much less today. So in terms of 1982 money, the 1880-S dollar has not increased 3½ times (somewhat less), but for today's money you can expect a much nicer coin. Nevertheless, as strong as MS-65 dollars are today, the possibility exists that another large hoard (Redfield) can be discovered tomorrow and dollars could be out of vogue. Most likely, as with the Redfield Estate, any new major hoard would quickly be absorbed by the market.

It now appears that a majority of the dealers are expounding upon MS-63 and MS-64 coins. This is not to say they don't like MS-65 (Pr-65) and "wonder" coins; but supplies are so thin and grading so tough that it is quite difficult to sell their clients coins which they cannot locate. MS-63 and MS-64 coins are a much larger supply from which to draw, although investors/ collectors are demanding coins be just as strictly graded as with 65's. The MS-63 and MS-64 is much more reasonably priced and the cost of a mistake is considerably less.

This Week's Market

CENTS: The 1983-P double die cent continues to show some action, but is usually limited to the same buyers and sellers. Currently, there are a few buyers of AU's at between $60 to $70 each. Reported sell prices are as follows: AU/$89; MS-60/$110; MS-63/$125; (ANACS graded coins command higher prices.) MS-60/60/$140; MS-63/63/$155; and MS-65/65/$250.

There were a few specific rolls of Lincoln cents on want lists at higher levels (1940-D, 46-S, 70-S sm, and 83-S pr), but for the most part, activity remains sparse.

NICKELS: BU Jefferson rolls appear to be receiving somewhat increased activity. There are a number of rolls higher this week and many others wanted at current levels. Those with higher bids are: 1939-P ($39), 40-D, S ($48 each), 44-P ($185), and 50-D ($210). There are a few dealers who want 10-15 rolls of the 1950-D at the new higher level. Roll sets of Jefferson nickels are wanted in the current bid/ask range.

DIMES: There are buyers of original rolls of Mercury dimes from 1934-45 at current levels; they will take quantities. The 1940-S roll is again higher; now at $775 "bid".

A couple of major buyers will take quantities of all Roosevelt dime rolls from 1946 to 1964. At this time, they are not raising their buy prices trying to outbid each other. The only roll higher this week was the 1954-P ($63). In the late-date rolls 1983-S and 84-S proofs are bid higher.

QUARTERS: Washington quarter rolls have buyers at current levels for all rolls from 1934 thru 1964. Also, a few roll sets are wanted at "bid". The 1955-P roll is higher at $115.

HALVES: There are a number of ready buyers of Walking Liberty halves. They will take original rolls or MS-65 singles at current levels. Strict grading, of course, is a must. And all pieces received which do not fully measure up as MS-65's are returned. There is certainly more than enough "close" specimens on the market, but true gems are usually located one or two at a time. This may be another area where dealers begin to market MS-64's.

The Franklin series remains stable at current levels, but there do not appear to be many rolls changing hands. Available supply appears mighty thin. When rolls are offered, they are quickly snapped up.

DOLLARS: Minimum "bid" for original Morgan rolls is now $875 (excluding 1921-P). The number of buyers for MS-63 and MS-64 dollars increases every day. Properly graded, these coins are not 65's, but are definitely attractive coins in their own right. Many dealers will pay at least "bid", while some dealers will pay more for specific dates. For the time being, the most active appear to be those priced at $400 or less. There are a considerable amount of "plus" signs in the MS-63 and MS-64 columns.

PROOF SETS and MINT SETS: Proof sets from 1936-1960 remain solid at current levels. Nevertheless, 1961-63 sets have dropped to $20 "bid". The high buyers are conspicuous by their absence and many lots go unsold unless they are discounted a little. The 1979-S TII sets moved up to $83 "bid".

Early mint sets are constantly in demand at "bid". Occasionally, dealers will offer as much as "ask" for a limited number of sets. The 1968 and 69 sets have increased to $2.35 each.

COMMEMORATIVES: Most of the Arkansas sets are higher in MS-65 again, but a problem arises in that these coins were struck weakly so that it is practically impossible to locate coins that fit the grade; especially at these higher prices. The Lafayette dollar is now "bid" at $7000 in MS-65. There have been no reported offerings which fit the MS-65 description.

TYPE: Proof and MS-65 type appear to be quiet, when in all actuality, there are very few coins available that fit the "bill". There are a few "plus" signs for specific Pr-65 coins, such as, Mercury dimes and Walking Liberty halves.

The 1796 Draped Bust quarter is higher in F, VF, and XF; when this rare coin trades it usually is over current levels.

GOLD: This is consistently the most active area of the market today. All Mint State U.S. gold is tradeable within their grade range at current levels or higher. Again, there is a rash of "plus" signs for MS-65 specimens, but very few are available. At these higher levels the coin must be quite nice (as with all series) and the novice should be wary of his ability to grade.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $327.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$35.00 per column inch, 2 column inches maximum

Advertising space is limited, ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (EXTREMELY FINE) Shows slight signs of wear on the highest points of the design. Luster is present but may be dull or lifeless. There may be bag marks and hairlines but they are not distracting. Eye appeal is average.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks (may show only a slight weakness of strike. Should have full luster and be choice in every respect. Eye appeal is well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

*SELLING by Auction? If you have a $1,000 collection, or a $20,000 collection or a $1 million collection you've come to the right place. If you have a MAJOR MUSEUM collection, we can handle it no matter the size or shape. Each consignment, regardless of size, gets our careful, expert attention.

McIntire Numismatic Auctions urges you to take note of these blockbuster sales. Just as purchases are carefully contemplated so must be the disposition of your investments.

McIntire Numismatic Auctions is pleased to annouce their 1985 Auction Schedule:

April 25-28, 1985. CENTRAL STATES NUMISMATIC SOCIETY (CSNS). In Minneapolis, Minnesota in 1985, we are pleased to be able to present our second CSNS Sale in conjunction with what most consider to be the second largest numismatic convention (behind the ANA)

August 15-16, 1985. MISSOURI NUMISMATIC SOCIETY SALE. St. Louis, Missouri. This convention is by far one of the best collector conventions in the central United States. The typical show attendance is about 10,000 individuals. Consignment deadline: June 15, 1985.

November 14-17, 1985. NATIONAL SILVER DOLLAR CONVENTION SALE. Again in St. Louis, Missouri, the 1985 Sale promises to be the premier sale for silver dollars, the most popular numismatic series. The bourse will have over 300 silver dollar dealer specialists and will be well attended. Sell into this strong market. Contact us, deadline: Sept. 12, 1985

January 24-26, 1986. GREATER HOUSTON MONEY SALE. This will be our fourth consecutive auction in Houston, Texas's largest city. Sell to the crowd. The show has a 140 plus dealer bourse and typical show attendance of 9,000 to 10,000 individuals. Contact us before November 23, 1985.

PLAN AHEAD: Contact us about selling into a strong market. Maximize your profits. McIntire Numismatic Auctions, P.O. Box 546, Jacksonville, Arkansas 72076. Phone: 1-800-221-9068.

BUYING
GEM UNC. (MS65)
SILVER DOLLARS

We need large quantities of Mint State 65 Morgan and Peace Dollars. We are looking for coins that are sharply struck, have full luster and a minimum of abrasions. We need coins with sharp breast feathers and clean cheeks. Natural toning is okay as long as it is not spotty or "dirty" looking.

Numismatic Certification Institute

The biggest questions when purchasing rare coins are 1) Grade 2) Value! With N.C.I. coins you know the grade and the value.

We are active buyers of all N.C.I. material.

THE SAFE WAY TO BUY COINS FOR INVESTMENT

All N.C.I. coins are graded and certified genuine with a photograph of the obverse and reverse (as seen above).

LET US DO YOUR HARD ASSET THINKING

1) Some coins have gone **up nearly 40%** this year!
2) Some coins are **grossly underpriced**!
3) Some coins should **not be purchased** at current levels.
4) Should you have bullion in your portfolio with the new IRS **Reporting Rule**?
5) Will the planned Monetary Recall effect the Rare Coin Market?

OUR BUSINESS IS THE CREATION, ACCUMULATION & PRESERVATION OF WEALTH!

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63--but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

CENTRAL STATES PACKS THEM IN

Large Demand for MS-63 "Walkers"

The Market in Depth

REPORT FROM CENTRAL STATES

Having gazed upon the masses at the Central States Coin Show in Minneapolis, it is quite evident that the "Bull" is gathering his strength for the upcoming charge. On Friday, the bourse room was so full that dealers without tables had a difficult time trying to do business; they had to wait in line or come back to the busy tables later. There was no mention by anyone of disappointment. All had at least a good show, while many had a tremendous one. Buyers definitely outnumber sellers and there is not enough fresh material to satisfy all the want lists. U.S. gold coins and silver dollars were the two most active series, while commemoratives and Walking Liberty halves were close behind. Original BU rolls were active, although in short supply and there were a number of new buyers of Mercury dimes.

Grading remains somewhat of a problem in areas where buyer and seller can't get together. Buyers have accepted a new stricter grading approach so they can protect their customers. Nevertheless, some sellers feel that buyers are too fussy. Moreover, every buyer has his own grading habits and through his years of experience has developed his own selectivity. For the time being, grading may be described as very conservative, but this can only prove beneficial to the industry in the long run.

In the silver dollar series, coins grading MS-63, 64, 65, and 67 were readily saleable. Many dealers had new buy prices and in some cases raised them over night. The problem here again is selectivity. The higher buyers might only select two or three coins out of ten closely matched specimens at their buy prices. Another key term being used more and more is "eye appeal". Buyers want particularly graded dollars with "eye appeal". This runs all the way down to "clean cheek" MS-60's (seemingly contradictory).

There were a number of special 'S' mint dollars (so-called common dates) that sold for anywhere from $750 to $2250 each. There was quite a selection of dollars to be found in the McIntire Numismatic Auction. After viewing the auction lots, the following is a condensed list of highlights of which we concurred with the grading.

Date	Grade	Price
1879-S	MS-67	$ 638.00
1880-S	MS-65	$ 550.00
1880-S	MS-67	$ 797.00
1881-S	MS-67	$ 715.00
1885-CC	MS-65/67 Cameo P/L	$1705.00
1886-P	MS-65	$ 440.00
1903-P	MS-65	$ 852.00
1904-O	MS-65 Cameo P/L	$ 715.00
1934-S	MS-64	$3850.00

This Week's Market

CENTS: BU Lincoln rolls have not shown as much fire as the rest of the market has for original rolls. Buyers not only want original, but also unspotted rolls. This week found 1948-S, 49-S, and 50-S bids at higher levels.

At Central States, the McIntire Auction sold a few BU rolls. Some of the coins did have minor spotting. A 1929-S roll sold for $286; while a 1930-S roll brought the same price.

NICKELS: Original Buffalo nickel rolls remain active at current "bids". A couple of exceptional rolls sold at auction; a 1937 roll brought $968, while a 1938-D roll realized $1100 (there were only 39 coins in this one!).

BU Jefferson rolls are again receiving activity; some at higher levels. The 1939-P and and 41-P have increased to $40 and $18 respectively. The 1948-S was higher, while the 50-P was offered at a lower level. The 1950-D appears to be elusive and a little higher at $215 "bid".

DIMES: BU Mercury dime rolls are extremely active at current levels. Where there were just a couple of major buyers in the last few weeks, there are now many. Some will even buy the balance of original rolls after a few pieces have been cherrypicked. Of course, the few FSB gems are sold immediately to the single higher buyer of this coin.

BU Roosevelt dimes do not lack for buyers, but not many rolls can be found. When available, they will definitely bring prices in the bid/ask range.

QUARTERS: BU Washington quarters will realize prices in the bid/ask ranges. The problem again is a lack of material. The 1955-P is higher at $120. The original rolls of Washington quarters in the auction brought in excess of current "bids".

HALVES: Original Walking Liberty halves (rolls or MS-65 singles) were very active at Central States. The number of buyers has increased as more investment houses sell to their clients. MS-63 coins were quite active as some buyers have increased their buy prices.

BU Franklin halves, like other late-date silver rolls, are tough to find. There are plenty of buyers, but sellers are apparently waiting for higher prices.

DOLLARS: MS-63 and MS-64 dollars are so active that dealers keep raising their buy prices to try and beat the competition. Many dealers have want lists ranging from hundreds of thousands of dollars upwards to a million. As in all areas, it is up to the final buyer (investor/collector) to be sure of the grade when purchasing dollars. One must learn to be as strict in their grading as the other dealers are when buying.

MS-60 Carson City dollars are now "bid" $95 with some dealers willing to pay more if the coins are somewhat cleaner. Original Morgan rolls are now up to a minimum $890 "bid" (excluding 1921-P). Several buyers just say, "ship for our high offer".

PROOF SETS and MINT SETS: Some dealers are looking to buy early proof sets, 1940-42, at $1100 each, but the coins (half and dime) must be gems. Silver proof sets 1961-63 are lower this week, as the main buyers have dropped their buy prices. Many sets go unsold unless they are discounted.

The 1985 proof set is on the market and offers to buy have been monitored at between $13 to $15. Some dealers have offered to sell sets for future delivery at $11.75 each. These sets are supposed to be available at government outlets in about three weeks (just like the 1984 proof sets).

Increasing activity is being reported for mint sets. Most bidding occurs at bargain-hunting prices, but usually to no avail. Some higher "bids" can be found for 1954, 55, 59, 68, and 69.

COMMEMORATIVES: As prices go higher for MS-65 commems sales become mixed. At lower levels, most all 65's sold. At the much higher "bids" some MS-65's do not sell at current levels. "Eye appeal" is mandatory at these higher levels. Some pretty nice coins do not fit into the new high "bids". In other words it takes an exceptional coin to command "bid" for some issues.

There are several "plus" signs for MS-65 commem gold. Here, close will not cut it. The coins must be full MS-65's.

TYPE: One dealer is offering to buy large cents (1816-30) in fine - $10.50 and very fine - $20. He is looking for 200 pieces. In the McIntire Auction a 1793 Wreath Cent sold for $5500 in XF. An 1803 Draped Bust cent realized $770 in AU. An 1880 Trade Dollar brought $2200 in Pr-63, while a Pr-63 1885 Morgan sold for $1870.

GOLD: The McIntire Auction gave us a chance to list some values of coins which are not normally traded;

Denomination	Grade	Price
1860-S $3 Gold	XF	$ 990.00
1872 $3 Gold	AU	$1375.00
1884-O $5 Gold	XF	$ 253.00
1853-C $5 Gold	XF	$ 220.00
1853-D $5 Gold	XF	$ 467.00
1857-D $5 Gold	VF	$ 247.00

An 1852 U.S. Assay Office Gold $50 piece in VF-XF sold for $8470. While an 1855 $50 Wass, Molitor & Co. in VF realized $9240. An 1854 $20 Kellogg & Co. in AU brought $2035.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $325.00 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (UNCIRCULATED) Strictly uncirculated showing no evidence of rub or friction. However no further qualifications are necessary. It will be bag marked and/or heavily nicked and may not have full lustre.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

We challenge comparison!

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65---but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63---but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

BROWN AND BLUE IKES ON MANY WANT LISTS

Original Dollar Rolls Searching Out New Levels

The Market in Depth

With all the talk of MS-65 coins (or lack thereof), there has been very little written of lesser grade coins. An area that has been overlooked for a good number of years is MS-63 type coins. The main reason they have been cast aside is, most dealers and collectors want the ultimate in quality. But, it can be pointed out by description, that MS-63 is still quite a coin; and there are more available from which to choose. With the decline in availability of MS-65 specimens, some low mintage coins are not "bid" that much higher relative to high mintage coins. This fact was recently brought to my attention in an article by an east coast colleague, Maurice Rosen. If one combines these two elements and locates properly graded MS-63 low mintage dates at or near common date levels, one would have to feel comfortable with one's position. The following is a list of MS-63 Barber dimes, quarters, and halves, which have low mintages (under 2 million), yet are priced within 20% of common date "bids".

MS-63 Barber Dimes — Common Date Bid $300

Date	Mintage	Bid	Date	Mintage	Bid
1898-S	1.7 Million	$ 350	1909-D	.9 Million	$ 350
1899-S	1.8 Million	$ 350	1910-S	1.2 Million	$ 350
1908-O	1.7 Million	$ 345	1915-S	.9 Million	$ 365

MS-63 Barber Quarters — Common Date Bid $575

Date	Mintage	Bid	Date	Mintage	Bid
1893-S	1.4 Million	$ 650	1908-S	.7 Million	$ 690
1895-S	1.7 Million	$ 640	1909-S	1.3 Million	$ 665
1897-S	.5 Million	$ 690	1910-D	1.5 Million	$ 650
1898-S	1.0 Million	$ 640	1911-D	.9 Million	$ 610
1902-S	1.5 Million	$ 685	1911-S	.9 Million	$ 650
1903-S	1.0 Million	$ 690	1912-S	.7 Million	$ 650
1905-O	1.2 Million	$ 665	1913-D	1.4 Million	$ 600
1905-S	1.8 Million	$ 665	1915-S	.7 Million	$ 600

MS-63 Barber Halves — Common Date Bid $1025

Date	Mintage	Bid	Date	Mintage	Bid
1892-P	.9 Million	$1025	1908-S	1.6 Million	$1150
1893-P	1.8 Million	$1025	1909-S	1.7 Million	$1200
1894-P	1.1 Million	$1025	1910-P	.4 Million	$1200
1895-P	1.8 Million	$1075	1910-S	1.9 Million	$1125
1895-O	1.7 Million	$1200	1911-D	.6 Million	$1025
1895-S	1.1 Million	$1150	1911-S	1.2 Million	$1100
1896-P	.9 Million	$1075	1912-S	1.3 Million	$1100
1899-S	1.6 Million	$1150	1913-D	.5 Million	$1025
1902-S	1.4 Million	$1200	1914-S	.9 Million	$1200
1903-S	1.9 Million	$1150	1915-D	1.1 Million	$1025
1906-S	1.7 Million	$1150	1915-S	1.6 Million	$1050

These dates are not meant to be recommendations, but comparisons of low mintage coins to common coins at relatively the same bid levels. This type of comparison may well apply to Seated Liberty coinage also.

The Coin Dealer Newsletter would like to offer condolences to the family and friends of Allen Harriman who passed away May 1, 1985. He will be greatly missed throughout our industry.

This Week's Market

CENTS: Some dealers are now offering up to $95 per bag for wheat cents. Action in the BU Lincoln roll market was virtually non-existent this week. Buyers want unspotted rolls; and sellers wish to get rid of rolls with minor spotting. Only a couple of rolls are higher this week: 1940-P (bid-$16) and 1946-S (bid-$12.50).

NICKELS: Both the Buffalo and Jefferson series are steady. Buyers for Buffalo rolls specify original and quantities wanted. The Jefferson series is not quite as strong, as most buyers limit the number of rolls desired. The 1950-D roll is now up to $220 per.

DIMES: Strong interest for Mercury dime rolls continues at current levels, although, perhaps tiring of unsuccessful attempts to buy rolls at recent levels, potential buyers have raised their offering prices for various rolls. Those higher are 1938-D, S and 1940-S.

All of the BU Roosevelt dime rolls remain on buying lists at "bid", or even a little higher when finally located. Several, specific rolls do have "plus" signs this week. The 1948-P roll is higher at $310, while the 1954-P, D rolls also increased. 1958-P has advanced to $82.

QUARTERS: As has been true for several months now, there are buyers for all BU Washington rolls. Most dealers are willing to buy at current levels and will take quantities, although single rolls are all that are usually found. When dealers want one or two rolls of a specific date, they usually have to pay "ask" or over.

HALVES: Walking Liberty halves remain quite strong. Original rolls, when found, will command prices in the bid/ask ranges unless they are the typical weak struck (flat) dates, especially 1940-S. As can be seen in the Monthly Summary this week, MS-63's show a lot of upward action. MS-65's are strong at current levels.

BU Franklin rolls are quite firm at today's bid/ask levels. There are a few market-makers who will buy every date at current levels. A few rolls have advanced as dealers try to satisfy want lists. The 1948-P, 52-D, 63-P and D are all higher this week. There are so many new dealers, large investment houses, financial planners, and investor/collectors trying to buy original rolls of silver coins, that someday original rolls of anything silver might just become obsolete.

DOLLARS: Common Carson City dollars are being traded in a very tight spread at this time. "Bid" is $95 in MS-60 and there are buyers and sellers at $100. Original BU rolls of Morgans are now "bid" $900 (except 21-P Morgan). Most original rolls are traded at higher levels, but buy prices are usually not tendered until rolls can be seen. Many dealers just say ship for our high offer.

Look at all the "plus" signs for BU dollars (MS-63, 64, and 65)! There are many buyers of properly graded dollars. But the key words are properly graded. Grading can vary from dealer to dealer. So, as we've stated before, educate yourself. Make sure you are comfortable with the grade of each and every coin you purchase.

Silver Ikes (BU and Proof) are extremely active at higher levels. Most issues are only "bid" one-third of their all time highs and many dealers are beginning to stock up.

PROOF SETS and MINT SETS: Proof sets from 1936 to 1955 are very active at current levels. From 1956 to 1964 sets seem a little soft and the usual buyers are trying to buy at lower levels. Not many sets have been reported sold at lower levels.

Mint sets continue steady at current levels.

COMMEMORATIVES: Some MS-65 commem issues have reached a level which many sellers feel is sufficient for the time being. Meaning, "bid" has advanced far enough; and buyers are looking for coins now that are just a bit nicer than MS-65. In general, many issues are still advancing as buyers try to satisfy want lists or attempt to locate the difficult to find issues.

TYPE: In the area of circulated type coins not many changes can be found. Many dealers are attempting to grade circulated coins as if they were new. They want nice coins with no distracting marks. This is highly contradictory by definition alone, especially in lower grades.

Specific MS-65 and PR-65 type coins have shown increased buy prices, but the number of buyers at higher levels is somewhat limited.

GOLD: Circulated U.S. gold is suffering a little in XF and lower grades because of bullion being lower. But higher grades are still extremely active at bid/ask levels.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on e basis of gold at $309.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market

INVESTORS NOTE: the prices in the Newsletter are from dealer-to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker

ADVERTISING RATES

$35.00 per column inch, 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

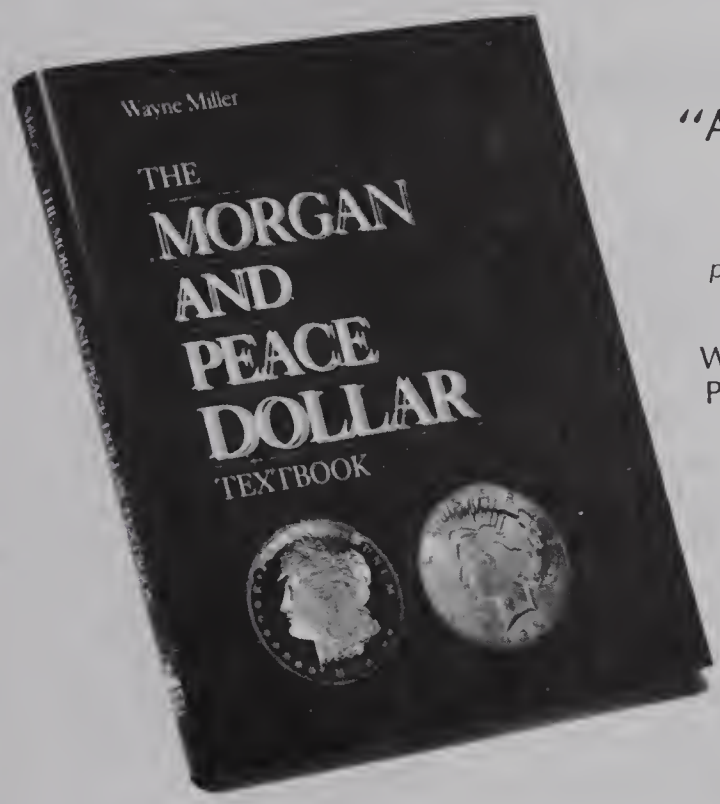
MS-60 (UNCIRCULATED) Will be struck on defective planchets, or carelessly struck, or carelessly handled after striking. May have bag marks, may show only a partial impression of strike. Should have full luster. These are well above average coins.

MS-63 (UNCIRCULATED) Will be carefully struck and have full luster (brilliant or original toning). May exhibit bag marks, may show only a partial impression of strike. Should have full luster. These are well above average coins.



MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing tips and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

The Morgan and Peace Dollar Textbook

by Wayne Miller

"A *must* for anyone who buys, sells or simply enjoys silver dollars."

— HANNES TULVING, silver dollar expert and president of one of America's largest rare coin investment firms.

Wayne Miller's 1976 classic "An Analysis of Morgan and Peace Dollars" revolutionized the rare coin market. Eight years later, his sensational **"Morgan and Peace Dollar Textbook"** is being called the greatest silver dollar book ever published! Here are more than 250 pages packed with vital information for both the novice collector/investor and the most astute silver dollar specialist.

INCLUDED ARE:

Over 400 color photographs of some of the finest known silver dollars, including the incredible 1879o Branch Mint Proof.

A comprehensive analysis of Prooflike Morgan Dollars, with a rarity rating for each date.

A chapter on Proof Morgan and Peace Dollars with color photographs of a*ll* the proofs, including Branch Mint Proofs.

A section on toning that contains over 50 color photographs of some of the most incredible toned dollars ever seen!

Detailed definitions of terms; relative rarity ratings on all Morgan and Peace dollars in MS-60, MS-63 and MS-65; characteristics of all 122 dates; and much, much more!

Many of the coins pictured in **The Morgan and Peace Dollar Textbook** are from the private collection of Wayne Miller, the collection that recently sold for a record $1 million-plus! This is your chance to see close-up the coins that made numismatic history!

WHAT THE EXPERTS SAY:

"One of the greatest works of numismatic literature. It is a true labor of love, packed with fascinating and useful information about the most popular and, arguably, most important coin in the world."

— DAVID HALL, rare coin investment expert and editor of the influential *Inside View*

"Wayne Miller's book ranks first among all books on silver dollars. Its readability and clarity — coupled with Miller's superior knowledge of his subject matter — makes for fascinating reading. The color photos alone are worth the price of admission!

— BRUCE AMSPACHER, silver dollar expert and publisher of the *Bruce Amspacher Investment Report*

Wayne Miller has long been recognized as one of America's top silver dollar experts. In the last 16 years, he has viewed nearly 2 million BU silver dollars, giving him a unique perspective on the silver dollar market. His knowledge has now been transferred to this beautiful hard cover book, a great addition to any library or as a gift to the numismatist in your family.

Have You Missed Any of Our Important Issues?

1. SPECIAL GRADING ISSUE, DECEMBER 1983, 10 PAGES, $6.00. This fascinating issue discusses the in's and out's of today's grading techniques. Ray Mercer explains how a coin's Luster, Strike, Lack of Marks, and Toning must display the necessary harmony to rate the MS-65 grade. Learn the correct points to look for and use them to your advantage. An excellent way to fine-tune your knowledge and a must for those of you who are interested in improving your grading skills. Spend $6.00 on an education before you spend $600.00 on a coin!

2. THE STATE OF THE RARE COIN MARKET, DEC – JAN 1985, 23 PAGES, $12.00 This jumbo issue is a must for every serious collector/investor! It covers a multitude of subjects including the outlook for 1985, grading, how to succeed in rare coin investments, how to buy & sell coins, the outlook for silver and gold, how to select a dealer, what series is the best investment/collection for YOU, how to avoid wasting valuable investment funds, the value of subscribing to newsletters, how to study coins, and many, many more important subjects pertaining to numismatics.

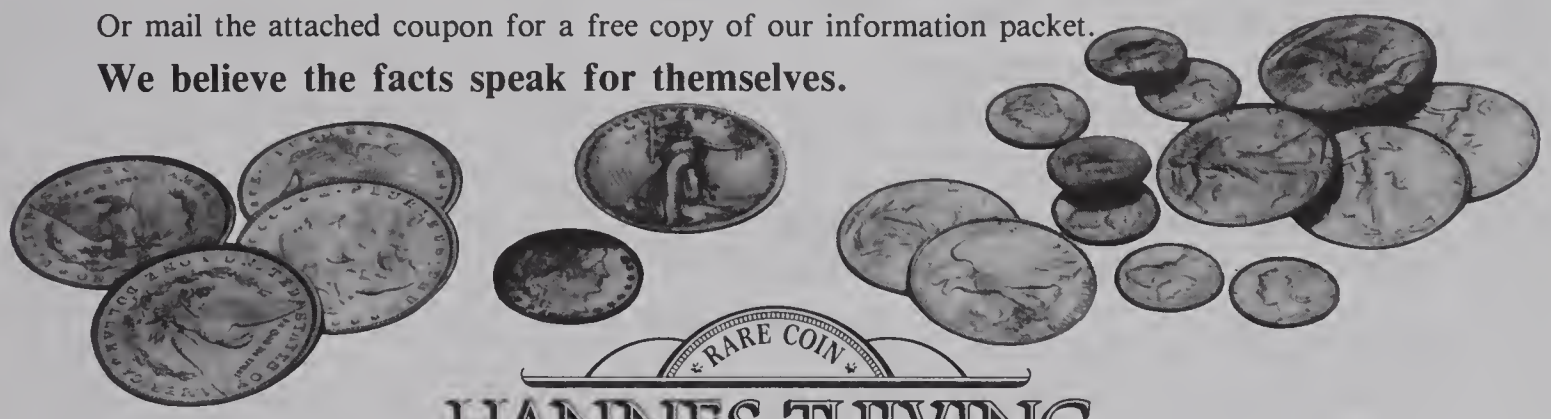
HOW DOES YOUR RARE COIN INVESTMENT FIRM STACK UP AGAINST OURS?

- **An Unmatched Record.** HTRCI clients have enjoyed profits averaging 25% a year — even during the brutal 1980-83 recession! No other rare coin company can make this claim!
- **More Investment Options.** We have nearly a half-dozen separate purchase programs, including the exclusive **Limited Term Portfolio Account,**™ a stunning success after just one year!
- **The Ultimate Guarantee.** At any time, we'll buy back our coins at the same grade at which they were sold for a minimum of wholesale "bid" as reported in the *Rare Coin Market Digest!*
- **Six-Month Portfolio Updates.** Twice a year, HTRCI clients receive a computerized report on the performance of ***every coin*** in their portfolios.
- **Total Commitment to Customer Satisfaction.** Company president Hannes Tulving, nationally recognized numismatic expert, personally selects the coins for each portfolio and remains available to answer all client questions and inquiries.
- **Leveraged Rare Coin Investment Portfolios**™. A unique opportunity to double your buying power and enjoy even greater long-term profits. No other rare coin company in America offers this innovative program!



Because of our unique skills and conservative investment philosophy, **no HTRCI client has ever lost money or has had a portfolio in anything but a profit position!**

This record is **unmatched by any other rare coin investment company in America!**

3. MS63+ TYPE COINS: A NUMISMATIC OPPORTUNITY, FEB. 1985, 8 PAGES, $6.00 This important issue challenges the belief held by many that only Gem MS65 coins are valid investments. This thought provoking commentary answers the following questions: Are MS63+ type coins a good investment? Are these coins destined to outperform, their MS65 cousins? Will today's MS63+ be considered tomorrow's MS65? What is an MS63 type coin and how much more money should I pay for a "+" sign? Do all MS63+ type coins possess the same investment potential? MUST reading for the astute investor & collector!

4. IT'S TIME WE DEFINED OUR INVESTMENTS! MARCH, 1985, 8 PAGES, $6.00 Are you spending your hard earned investment money on guaranteed buy backs, "paper coins", or past price performances instead of coins? Does basic greed stand in your way of taking profits? There are many ways rare coin companies try to influence you to spend your money with them. We explore some of these marketing tools and tell you the pitfalls and how to profit from these promotions before it's too late! MUST reading for the serious investor!!

5. U.S. COMMEMORATIVE PACKAGE, $20.00 This package includes our classic 68 page report, published in August 1983— *U.S. Commemoratives: Investment Coins for the Eighties*. Now in its second printing, this report contains detailed information on investing in commemoratives, the incredible potential of PDS sets, toning and its pricing impact, rarity rankings, a COMPLETE type and date analysis of EVERY gold and silver commemorative and MUCH, MUCH MORE!

In addition, the just published *U.S. Commemorative Retail Price Review* (April 1985) which includes for the first time anywhere retail values for MS63+ (MS64) silver and gold commemoratives! Retail prices for all silver and gold commemoratives in MS63, MS63+, MS65 and MS65+ grades. Relative ratings for MS65 silver commemoratives, current market update and MUCH, MUCH MORE!!!

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 -but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

AUCTION ROOMS AND BOURSE FLOORS SHOW CONSISTENT STRENGTH

Small Shows See Rise In Attendance

The Market in Depth

Why is it that the market is hot in many areas (series) at coin shows, auctions, and for many of the investment houses, yet, when one walks into the local coin shop, activity goes unnoticed. There are a number of reasons for this, but first and foremost, to reiterate, the market is hot.

Coin shows offer the following advantages:

Central Location. Coin shows are usually held in the same location each year. Dealers, collectors, and investors get used to attending certain shows and are accustomed to doing a predetermined volume of business.

Past Reputation. A particular show will build a reputation as the years go by. The more active a show is, along with an ideal location will attract many more attendees.

Advertising. Advertising for a coin show can be a big advantage, as it is more like co-op advertising. The public can see many dealers at one time. They can then compare prices and quality, while keeping travel expenses at a minimum. Attending a coin show may also save time it would normally take going to a number of coin shops.

Dealers and/or Buyers. Coin shows offer the largest means of attracting dealers in one place, at one time, in order to select the merchandise they need for their customers. There are many large dealers at this time, who need millions of dollars in rare coins and many are paying top dollar to get them.

Auction companies offer a mass sale of rare coins at a specific time and place. Grading is done for the bidder (coins should be seen and graded by the actual buyer) and sometimes estimates are even made of the prices at which the coins will sell.

Advertising. Advertising can be a big advantage for the auction company. They have time and money available to produce a flamboyant catalogue in which to sell themselves and the coins in the auction.

Reputation. Based on their past auctions, a company may improve their reputation by the quality of the lots in the auction, by the proficiency of their grading, and by the number of buyers in attendance.

Audience. The number of bidders at most auctions has been improving over the last year and a half. The number of dealers viewing auctions lots, trying to buy for want lists has increased. The investor/collector, who hopefully has improved his grading technique, is attending more auctions as he tries to cut out the middle man and buy direct.

The large investment houses, with their mass marketing techniques have really increased sales in our industry over the last few years.

Advertising. In some cases, advertising budgets are extremely large. Some companies spend as much as a million dollars a year or more just for advertising. So one realizes immediately that they must do a tremendous amount of business just to break even.

Employees. The number of people employed to carry out this volume of business is astonishing. The more people employed, the more possible buyers may be contacted to purchase coins. In many companies employees are paid a fixed salary and/or bonus, while other companies work strictly on a commission basis. Those on a commission must perform, so one knows a lot of people are contacted. Again, this is mass marketing.

Inventory Volume. Many companies have a tremendous inventory from which to draw, while others have a difficult time keeping coins in stock. Either way, the volume of business is so large that these companies have to be where the action is, in order to buy more coins for their customers.

Needless to say, the investment programs offered by many companies is the main reason the rare coin market is so active. The main problem as seen by the local coin shop proprietor is that he/she cannot compete with the large advertising budgets administered by coin shows, auctions, and investment houses. The local coin shop can offer personal service, low markup, past reputation, expertise (this must be verified with any dealer one buys from), and a willingness to satisfy the customer.

The local shop will eventually pick up some of the overflow business of the major investment houses because the customer wants personal service. The localized customer will also begin to buy more from his local dealer as he loses confidence with savings and loans and also as gold and silver begin to climb.

This Week's Market

CENTS: Wheat cent bags are now wanted at $100 per, while 'S' mints are at $135. There are several rolls of BU Lincolns actively being sought at current levels: 1935-P, 36-P, 39-S, 40-D, S, 42-P, 45-S, 46-P, and 50-P, D.

NICKELS: The Jefferson series appears to be mildly warm. With the war nickel rolls still active in the bid/ask range, other rolls are beginning to show signs of consistent activity. The 1950-D roll is higher again this week at $225. Other BU rolls following this lead are 1939-P, 40-D, S, 41-P, 47-S, and 52-P.

The Buffalo series (1934-38) continues steady and at least two buyers are constantly seeking out deals of original rolls at "bid" or higher.

DIMES: The only thing keeping the Mercury dime series from going higher at this point is, while there are many buyers at "bid" levels, there are also a number of sellers at the same levels for most rolls (1934-45). Some of the buyers want rolls with split bands intact, while others just want nice original rolls. Albeit, the 1938-D and 1940-S rolls did advance this week as one buyer tries harder to find these elusive rolls.

The BU Roosevelt dime series remains constant, but sellers are not eager to loosen their hold on most rolls at "bid". Most trading completed is for just one or two rolls. The following rolls advanced this week: 1948-P, 54-P, and 58-P.

QUARTERS: Except for the 1940-P and 58-P, all BU Washington quarter rolls can trade at current "bid" or higher if they are original. As has been the case recently, not many rolls are available. Those rolls showing increasing action are 1955-D (bid-$175), and 1960-D (bid-$95). The 1958-P quarter backtracked this week as one large deal was offered and remained unsold at this writing.

HALVES: Although "plus" signs are not evident, original BU rolls of Walking Liberty halves are very strong. Not many are encountered; but when they are, most sellers want ask to ask plus 10%.

A few groups of 1955-P halves were offered and went unsold this past week with the expected result of lower bid. Bid is now $390 per roll. There are buyers for all other rolls in the bid/ask range.

The 1964 proof Kennedy half is very soft, as many rolls are offered, but sales have not been reported. The 1965 and 66 sms halves were both higher this week.

DOLLARS: Carson City dollars are hot. Most dates are higher this week in MS-60 and MS-63. There are several better date dollars higher in MS-63 including 1893-P, 94-S, 95-O, S, 96-S, 01-P, 03-S, and 04-S. There is a large quantity of "plus" signs for MS-65 dollars at higher levels. In somes cases, the higher bids are a result of one active bidder, but the fact remains that there are still many competitive buyers at last week's "bid" prices. There are a few dates which constantly advance, but are seldom, if ever, encountered in MS-65. For example, 1879-O and 1880-O are just not around in the conidtion for which a buyer would pay "bid". If the coin does surface, it would probably command one and a half to two times "bid".

Except for the 1973-S Brown Ike, this series is beginning to attract attention. Many dealers are stocking up. In order to do this, they have to advance each other's bids.

PROOF SETS and MINT SETS: Early proof sets (1936-42) are very active as many buyers look for nickels, dimes, or halves which qualify for PR-65 prices. The 1950-55 sets show constant activity with some at higher levels.

Mint sets are mixed this week as the 1954, 55, 59, 60, and 69 are higher, while the 1951, 70, 75, 76, 81, and 84 are lower.

COMMEMORATIVES: MS-65 commemoratives indicate a rather large number of "plus" signs this week. Over the last couple of weeks a balance of equal buys and sells have been reported for the easier to locate issues. This means that those issues without changes are apparently at a comfortable level. Whcreas, those with "plus" signs are increasing because buyers need product and cannot locate enough.

The same may be written for MS-65 gold commems, as there definitely are not enough gem specimens around.

TYPE: Proof and MS-65 copper type coins have fallen again this week. Many dealcrs and collectors are afraid of the possibility of future spotting of these early typc coins. Aside from this, many other PR-65 and MS-65 type coins are on want lists at higher levels. At some coin shows not more than a handful of coins qualify as 65's.

GOLD: Gold type sets continue to be put together and sold. This causes the individual coins to remain active in all grades. In MS-60 thru 65 there are many buyers for accurately graded coins. In VF-AU there are many "plus" signs with some specific issues able to sell at the next higher grade. This often occurs in a hot market.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue ara figured on a basis of gold at $325.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$35.00 per column inch, 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (EXTREMELY FINE TO ABOUT UNCIRCULATED) Will have light even wear on the highest points of the design or slight weakness of strike. Should have full luster. These grades are above average coins.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full luster. These grades are above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

PROFIT$ AND PROPHET$:

Your inside track

1. Would you like the latest recommendations, market insight and charted track records of Bruce Amspacher, David Hall, Hannes Tulving, Anthony Swiatek, Maurice Rosen and others?

2. Dealers, are you ready for the massive surge of new investors already in position to flood into the rare coin markets? Are you prepared with the answers and the material they will demand?

3. Investors, would you like the best introduction to investing in rare coins on the market today?

1 Gary North's INVESTMENT COIN REVIEW features insights and advice of the top coin experts in one newsletter. The editorial board reads like a "Who's Who" in rare coins and you'll see their specific portfolio recommendations with the results tracked and listed in order of performance.

The ICR gives **you** the **decisive advantage** over other coin investors. Plus, see which coins are recommended by several dealers at the same time — the "creme de la creme." 12 issues per year, **$67.**

2 Gary North's RARE COIN INVESTMENT MANUAL. This 550-page manual is the best A-Z coin investing guide available at any price. The **Rare Coin Investment Manual** teaches you successful coin investing without entering the school of hard knocks, a **$97 value.**

3 RARE COIN INVESTMENT MANUAL UPDATES (six new chapters each year) will keep you informed of the overall coin market trends, a **$37 value.**

4 THIN MARKETS — FAT PROFITS two tape set. Dr. Gary North interviews two rare coin experts who explain why the rare coin market is compressed like a tightly coiled spring and is ready to explode with opportunity, a **$19.95 value.**

A TOTAL VALUE OF $221 FOR $67

Gary North's INVESTMENT COIN REVIEW

HERE'S WHAT THE DEALERS SAY!

"Gary North's 'Investment Coin Review' will do a great service for investors looking for up-to-the-minute information from a variety of coin dealers." **Ed Lee, President, Lee Numismatics**

"Gary North's Investment Coin Review combines the best ideas of a dozen of the sharpest coin minds. It is a great newsletter for all coin investors but it is particularly useful for investors who are just starting to get involved with coins." **David Hall, President, David Hall's Numismatic Investment Group**

"As a dealer, it is much easier to do business with a well informed client who knows the basics and speaks the same language." **Craig W. Rhyne, President, C. Rhyne & Associates, Seattle, WA**

"The RCIM provides its readers with the best advice available." **Michael G. DeFalco, DeFalco Numismatic Investments, Inc.**

HERE'S WHAT READERS SAY!

"An excellent newsletter and a super educator. I'm now confident enough to go ahead and make my first rare coin investments." **H. H., DeLano, MN**

"Your Rare Coin Investment Manual and Investment Coin Review newsletter have been a great help to me in learning about this market. I wish I'd known about them sooner, so I could have made some larger purchases. Thanks for the help!" **J. H., Ridgewood, NY**

HOW TO SAVE 2 - 5 TIMES THE COST OF YOUR SUBSCRIPTION TO THE INVESTMENT COIN REVIEW

When you subscribe to the **Investment Coin Review** you get, as a FREE BONUS, a 10% over cost one-time discount coupon for a **true** rare coin portfolio. **(This one coupon will save you 2 to 5 times the yearly cost of the Investment Coin Review.)**

Gary North's Amazing, No-Risk, Almost Irresistible 100% Money-Back Double Guarantee (That you'll probably never use)

1. Like all Gary North offers, you can "test drive" at our risk — not yours — for a full 45 days. While such massive offers of highly prized financial information are usually offered on an "as-is" basis, your money is always securely guarded by our return policy. If for any reason you decide that you don't need the financial protection offered by Investment Coin Review, just send the unmarked bonuses back, and we'll refund your full purchase price. No questions asked. No hassles. No delays. (We do this because only a small number of people ever cancel, which is in itself our best testimonial!)

2. Just for trying Investment Coin Review, you can keep the 10% over cost discount coupon as our gift to you. (Who else but Gary North puts money in your pocket before you put it in his? Just another example of why Gary North has such a loyal following!)

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same charecteristics as the MS-65---but with the additional feature of deep mirror prooflike surfeces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck ---and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 -but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

DOLLARS AND HALVES STILL LEAD ACTIVE MARKET

Buying Gem Material is The Problem-Selling is Easier

The Market in Depth

The question of quantity vs. quality. More may be the better philosophy for some coin buyers, but quality is what is instilled in each and every person in the United States. Quality of life is taught at a very early age. As one proceeds through the school system, one strives for A's and B's, not C's or D's. A university is more desirable than a college, a Mercedes is better than a Ford, and a house in Beverly Hills is more coveted than one in Timbuktu. Nevertheless, not everyone can attain their highest goals. That's why horse races have a "place" and "show" payoff. They are still profitable if bet wisely.

For the quantity buyers, exact grading is still a necessity. The advantage here usually, is less downside risk for properly graded coins. Whereas, upside would not be as dramatic as the more desirable MS-65 specimens. The risk with MS-65 coins is that a large supply may come on the market and drive the price down. (Tongue-in-cheek; it is not likely that large quantities would become available, but it must be remembered that the rare coin industry, like many other supply/demand products, does have and always will have up and down cycles.)

For the quality buyer, MS-65 coins may be too few and far between to obtain or they may not be affordable. If this is the case, one might buy the best quality relative to one's income status. But, the higher the quality, the more expertise required to ascertain the grade. It then follows that there are fewer dealers at the top of the quality spectrum. If every dealer would grade MS-65 coins (agree on grading?) like they were for their own portfolio or that of their very best clients, instead of, "I hope these work with the higher buyers", then, the coin industry would be in a less state of confusion over grading. The reason dealers wish to sell their "no question" MS-65 coins to their best clients is obvious: They want those coins back again when the client takes his profit. Many dealers do just that for this reason. They keep the very best coins for themselves or their Triple A clients and offer the close graded coins to the higher buyers. If some of the coins sell as MS-65's, all the better. Remember, MS-65 (or any grade) is in the eye of the beholder. In essence, most all dealers will grade very strictly when the coins they buy are for themselves, but when selling to the higher buyers one expects their grading to become just a bit looser.

This Week's Market

CENTS: Buyer interest is relatively non-existent this week for BU Lincoln rolls. There are no price changes because bargain hunting, at best, is the name of this game.

The 1983 D/D cent is wanted in MS-65/65 by a few dealers in the $200-$215 range. The coin must have ANACS papers.

NICKELS: Hardly any changes appear for BU Jefferson nickel rolls, although there is still consistent bidding for various dates at current levels. However, most of the bidding is being generated by one or two potential buyers.

DIMES: Potential buyers of BU Mercury and Roosevelt dime rolls are still out there, but activity cannot be counted by "plus" signs. Most bidders feel reluctant to raise "bids" since there is not much available anyway. There are a number of buyers at current levels. Some buyers are prepared to pay more if the right deal comes along.

QUARTERS: BU Washington quarter rolls are just about like Roosevelt dimes. There are a number of buyers at "bid" for every roll except the 1958-P. The lone "plus" sign this week is noted for the 1943-P roll at $280 "bid".

HALVES: Gem Walking Liberty halves remain quite strong at current levels with some dealers raising their buy prices even higher. The same can be said for original rolls as even more buyers compete in this area. Many of the investment houses send their best coins to ANACS to be graded. The coins certified as MS-65's, in most cases are very nice coins. But, it must be pointed out that there is a difference in dealer buy prices for coins certified as MS-65's with a weak strike and ones with a strong strike. By ANA grading standards a 1940-S Walking Liberty half in MS-65 can be worth as little as $50 or well over $1000. The reason for this is by ANA guidelines, strike is not a consideration. This example points out how important grading knowledge is and that this responsibility rests with the ultimate buyer.

As an added note, CDN prices do take strike into consideration in all series.

DOLLARS: Several "plus" signs are scattered along the MS-60 column for Morgan dollars. A few dealers will now buy put together rolls of dollars as long as they are "new". Buy prices have been reported as high as $800 or more.

MS-65 prooflike dollars are a rare commodity. Most coins that are close will be either deep P/L, MS-64's or semi-P/L, MS-65's. Rarely will both qualities be met. When they are encountered buyers will pay at least somewhere in the bid range. This week finds a number of these elusive coins at higher levels.

Brown and blue Ikes are steaming. Buyers are everywhere, claiming to be the higher buyer. All the blue's are higher, while the brown's are mostly active at "bid" with some occasionally higher.

PROOF SETS and MINT SETS: A few of the late-date proof sets are higher along with a few silver sets. The 1950, 51, 52, and 58 sets are higher as several buyers are looking for quantities. In many cases, dealers have buyers for the gem halves out of the sets. One dealer has been looking for a gem cameo proof 1950 half for at least six months. He will pay as much as $800 for the right piece.

COMMEMORATIVES: There appears to be very little action in anything less than MS-65's. Most trading is completed in the bid/ask range for less than MS-65 material. There are a number of "plus" signs again this week for MS-65 silver and gold commems. There are a few dealers still trying to locate a gem MS-65 Lafayette dollar. It is doubtful that all orders can be filled---at any level.

TYPE: Again, most activity is centered in proof and MS-65 material. This is one of the most overgraded areas of the market and properly graded MS-65's are not in plentiful supply. Therefore, higher prices can be found along these columns on page 6.

GOLD: Here we go again. Mint state gold is higher for many issues as several dealers up their buy prices. Certified coins are becoming more popular as a few more companies gear up their business to offer their own certification service. Some companies sell sealed package certified coins. One buyer is looking for MS-60 $20 Liberties and St. Gaudens but they must be certified by ANACS, A-Mark, or NCI. He will pay $600 and $700 respectively.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $314.50 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: The prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$35.00 per column inch; 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark--these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices--particularly the pre-1941 issues. Washington rolls--dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

How to get an Uncirculated Morgan Dollar FREE!

Having you as a Heritage customer is our number one goal. So to introduce you to our quality and service, we're offering *FREE SAMPLES* from our regular inventory of Morgan Dollars. To qualify for your *FREE SAMPLE*, simply fill out the coupon below and send it to us with invoices showing where you purchased within the last 12 months *single* rare coins *(no rolls or bulk quantities)* totaling more than $2,500 from another. major mail order coin company, or more than $5,000 from another auction company (other than Heritage Numismatic Auctions). The invoices must be for purchases of pre-1934 rare U.S. coins. Only one *FREE SAMPLE* per family will be sent, and you or your family member must not now be known to us. Offer expires May 31, and all requests must be postmarked by that date.

Upon receipt of the qualifying invoices and coupon, you'll be sent immediately (to the address shown on the invoice unless otherwise instructed) an uncirculated Morgan Dollar in MS-60 condition or better. The Dollar will be from our regular inventory, and will be sent to you on the same day as we receive your qualifying invoices — just as if you had ordered the coin.

Keep the coin with our compliments, and with no further obligation. But if you like the quality and service you received, we hope that you'll call us with your next rare coin order, or you'll give us your want list of coins you need to complete your collection.

Here's the kind of professional treatment you can expect when you call

- *Excellent Numismatic Advice – over 35 years combined experience from our two founders alone*
- *The Security and Financial Strength of the Largest Firm – assurance that we'll be in business years from now to help you continue or liquidate you collection*
- *Personal Attention to Your Needs – a professional, experienced numismatist assigned to assist you*
- *The Quality Coins You Need, When You Need Them – the largest selection of constantly changing inventory, available to you on approval*
- *The Best Value When You Buy – we guarantee to never be undersold on any comparable coin*
- *The Most Money When You Sell – the finest auction service puts competition to work for your coins*

Take advantage of our *FREE SAMPLE* and discover the rare coin quality and service you deserve. You've got nothing to lose, and an uncirculated Morgan Dollar to gain!

This offer is good as long our supplies of suitable Morgan Dollars last. So hurry and send for yours today.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same chereteristics es the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63--but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.
